# HERE'S SOMEONE WHO KNOWS ALL ABOUT OUR GREATEST HITS

Whatever we've inflicted on the unfortunate star of our advertising, was all done with the best intentions.

After all you need to be alerted to all the latest info on our best-selling, award winning MegaTitles like EA Hockey, Road Rash and Desert Strike.

To this end we make no apologies for doing just about everything but have him swim blindfold through a shoal of barracuda.

(Now there's an idea.)

EA HOCKEY

JAMES POND II

ROAD RASH

DESERT STRIKE

PGA TOUR® GOLF

JOHN MADDEN AMERICAN FOOTBALL

F22 INTERCEPTOR

SHADOW OF THE BEAST

And watch out for these new hard-hitting Mega Titles, coming soon on EA: EASN World Basketball™ Twisted Flipper, Aquabatics, Where in the World is Carmen Sandiego™? Powermonger™ and LHX Attack Chopper.

PGA TOUR is a registered trademark of PGA TOUR, Inc. Used with permission.

## MEAN MACHINES JULY ISSUE 22

### EDITORIAL

6

Just back from the Chicago CES, Jazza manages to squeeze in this exciting article before MEAN MACHINES is sent to the printers. Yet more people are gratuitously insulted without prejudice and some more amusing photos are printed for your entertainment.

### NEWS

10

MEAN MACHINES, the magazine traditionally associated with the hottest news stories, does it again - this time with a massive eight page CES Show special. Find out about ALL the new console games, months before they're released! Cool, eh? Check it out!

### STREET

### FIGHTER II

22

The hottest, and perhaps greatest, game ever - given the FULL MEAN MACHINES review treatment in the first ever FIVE PAGE review! Wowwww! Find out everything you wanted to know about the game, including the characters' blood types!

### MEAN YOB

28

MEAN YOB's back, his sack packed to capacity with your letters. This month, he's got a mixed bag of letters - some good, some completely crap that you wonder why we printed them. Just who will be put down in a highly hilarious manner this month? Turn to page 28 and find out.

### Q+A

32

Although it's a boring and thankless task, Jazza has once again put fingers to keyboard to answer some of your console queries (like Gary Harrod). Examine these pages and who knows? Your question may have been answered. Coo.

▲ First with the review, first with the cheats! Turn to the Editorial to discover how to play Street Fighter II with the SAME characters! Amazing or what?

## REVIEWS MEGADRIE

DRAGON'S FURY	52
ARCH RIVALS	68
TALMIT'S ADVENTURE	76
SLIME WORLD	80

## NINTENDO

LITTLE NEMO	72
GODZILLA	84
TINY TOONS ADVENTURE	92
MICRO MACHINES	108
CRACKOUT	112

## MASTER SYSTEM

PRINCE OF PERSIA	88
ARCADE CLASSICS	100

## SUPER NES

STREET FIGHTER II	22
TOP GEAR	56
MAGIC SWORD	102

## TIPS

Turn to page 38 for the nightmare of Rich's month - the Tips Section. This month he's come up trumps with detailed tips for the Master System version of Donald Duck along with a completely mega Smash TV map that gives away the game's many secrets! Add that to the vast range of topper little cheats and you've got eight pages of topper completely dreamy stuff!

## THE GAME GENIE EXPOSED!

The Game Genie is Codemasters' amazing little widget that enables you to 'enhance' your Nintendo games by typing in some easy-to-enter codes. Find out just how good it is when we give you the full, unadulterated review!

## CHARTS

Nintendo sent us two charts last month. This month they couldn't even be bothered to send one! Oh well. Check out the new Sega charts and look at last month's Nintendo ones in this amazing double page layout that took us ages to do.

## THE HOTLINES

Cool! We've decided this month to actually print a NEW Hotlines page, instead of the old one which was in all fairness getting on a bit. Turn to this page and get dialling now for your chance to win some of the best consoles gear money can buy!

## MEGAMART

Check out these many pages of small-point (unless we haven't got enough to fill the pages) text in search of an elusive bargain - so elusive in fact that it might not be there at all. That's half the fun when you turn to page 117 and examine the section of MEAN MACHINES that we like to call Megamart.

## EXCLUSIVE ALIEN III PREVIEW!

Yes! Once again, MEAN MACHINES scoops the entire console magazine industry by printing everything you need to know about Acclaim's potentially mega Alien III!

## PREVIEWS

Wow! This month we've gone for broke by producing what must be some of the most packed preview pages ever. Check out Krusty's Funhouse on Super NES! Witness Bart Vs the Space Mutants on the Megadrive! Thrill to the likes of Darkman, Hudson Hawk and Switchblade II on Nintendo. Corrr!

## NEXT MONTH

Notorious for its complete lack of information and misleading artwork, the MEAN MACHINES next month page strikes again with... no real information at all and misleading artwork. This month, we've even got the publication date for the next issue printed correctly. Can't say fairer than that can we?

Any reprinting, retransmission or reproduction of this magazine without the express permission of the publishers will result in us whacking not our lawyer and all their legal emanations. The ensuing bombardment will leave you penniless, destitute and probably sore about the rather expensive fee.

## COMPETITION RULES

EMAP Images employees or their immediate family aren't allowed to enter any of our competitions. This is because we've decided to give everyone else a chance to win all the absolutely fantastic prizes we have on offer. Don't we know. Well, nearly. The unknowns come into effect whenever Dawson Munton of West Wotwood and his relations are mentioned. They all work in a famous spreadsheet painting plant and before they put this brush into the printing they stick them up their bum. And because of this they're not allowed to enter any of our competitions. JAZZ IS A FINAL BIT

Anyone out there a code collector? If so, crack this simple code and you'll find a special

message waiting for you. A small team did jargon-craze shiver but good boys did give the story four yep thumbs. There's a prize for the first person to do it. Send in the cracked code to: IT'S SCIENTIFICALLY PROVEN THAT ELEPHANTS ARE SCORN ALCONQUIDS, MEAN MACHINES, PRIORY COURT 30-32 FARRINGDON LANE, LONDON, EC1A 3AU. And if you can't crack it - guess!!

## THE PUZZLE PIC

Just in case you're having difficulty putting your Feb puzzle back together again (Doh!), here's

the completed picture for your reference, enjoyment and general leisurely perusal of.

JAZZ

If you read last month's magazine, you'd have noticed a new face. Rob Bright is his name and he's the latest addition to the MEAN MACHINES team. He's from Borehamwood in

Herts (although we don't hold that against him) and it was he who was the successful applicant to the MEAN MACHINES staff writer and we ran a few months ago. So say hello Rob and make his feel nice and welcome.

Right, now I've got that out of the way I can talk about something that's really bugging me - the price of Nintendo and Sega 16-bit hardware. If you lived in America

and wanted to buy either a brand new Megadrive or Super Nintendo, all you'd have to fork out is \$99.99 - a measly £55.55. Okay, so all you get is the hardware, but nevertheless, that's ridiculous compared to the price of European hardware. Even if you're ultra-conservative and take into account a generous export cost, extra VAT, import duty and

shipping there's still a huge gap between the US prices and the £129.99 (\$240.00) price tag of a Megadrive and the £149.99 (\$270.00) charged for a Super NES.

Now I'm not saying that we expect the same prices as America, but surely there's some potential in there for a price drop to £99.99? So how about it?

## STREETFIGHTER II STOP PRESS SENSATION!

We just can't believe it! Just when we thought that Streetfighter II was the best thing since sliced bread (it's been awarded 98% in our exclusive 5-page review), we've been specially faxed this red-hot tip from Japan. What does it do? Well, it lets you participate in fights using the same characters, just like Streetfighter II. Championship Edition! Incredible or what?

To get the cheat to work, switch on the machine and as soon as the Capcom title comes up press: DOWN on the pad, the top RIGHT button, UP on the pad, the top LEFT button, then Y, B, X, and A. You have to do this very quickly before the Streetfighter II logo comes up. It takes quite a bit of practice, but you know when you've been successful because there's a little ping noise and the screen goes blue. Once done, just play the game as normal and select any characters you like. Don't forget - you read it here first!!!

"My big school play performance came when I played the judge in Joan of Arc. Dressed in a sheet with curious, crusty yellow stains all over it (none of them mine, I'll hasten to add), I had to provide the drama during the trial scene. During one of Joan's long and rather tedious speeches my mind wandered and when it came to my lines I completely forgot them. Doh!"

CURRENT FAVE GAMES: STREETFIGHTER II

"After being threatened with a fate worse than death, I was forced to play Bamber Gascoigne in our 'hilarious' sixth-form skit on University Challenge. I had to ask desperately untunny questions and provide embarrassingly humourless punchlines. I was so busy trying to look like I wasn't enjoying myself that my deadpan performance was actually successful."

CURRENT FAVE GAMES: STREETFIGHTER II

"In primary school I was cast as one of the brothers in our lavish production of Joseph and his Amazing Technicolour Dreamcoat. I had to do a solo, and for some unknown reason had to sing it in an American accent. This was fine until I moved up to secondary school where everyone knew me as 'that n0b who sang that crappy solo'."

CURRENT FAVE GAMES: STREETFIGHTER II

I was a chorus boy in my school's splendid rendition of Oliver. I was one of the tramp kids and had to wander around looking useful while singing my head off. Everything went super-smoothly and the audience loved it. I nearly thought of taking up acting full-time, but my designing talents are far greater than my acting!

CURRENT FAVE GAMES: STREETFIGHTER II

Coming from an impoverished Dickensian-type school where they had drill practice between 5am and 9am and then spent the rest of the day making matches, Gary never starred in a school play. Aaaah! Siff, we reckon he would have made a brilliant Charles Manson...

CURRENT FAVE GAMES: STREETFIGHTER II

"The best school play I was in was written by my very own self, and starred me as a teacher. Halfway through the production, which was played in front of the entire school and its governors, I suddenly realised the character I was playing bore more than a passing resemblance to my head teacher... and he was not amused. If you're reading this, Mr Westrip, it really wasn't meant to be you!"

# CES SHOW

Here it is! The first full report on the Chicago CES show, brought to you by a very jetlagged Julian Rignall. There was plenty to see and loads of games on display - the complete list is printed later on in this special news feature. Want to find out what's hot and what's not? Then read on dear reader...

## ACCLAIM GO BANANAS

The Acclaim/LJN/Flying Edge/Arena (for they are all one company) stand was a veritable bulge-let of new games. My pick of the bunch was the Amazing Spider-Man and the Uncanny X-Men on Super NES. It's looking very good indeed, with excellent graphics and sound.

Also on Super NES was Bart's Nightmare, a jolly playing but rather 8-bit looking Simpsons game. Roger Clemens MVP Baseball (stunning-looking, but unfortunately it's baseball). George Foreman's KO Boxing (similar to Punch Out!), NBA All-Star Challenge (very good) and Krusty's Funhouse (great).

The following list features every game featured or announced at the show. At present few are definitely scheduled for European release - some might never appear at all in this country - but as soon as any of them have firm release dates, we'll be the first to tell you.

### MEGADRIVE CD-ROM

### MEGADRIVE

SUPER BATTLE TANK  
ABSOLUTE  
ARABING TENS  
ABSOLUTE

On the Megadrive was a very early demo of Terminator II: The Arcade Game (which will be bundled with the forthcoming Menacer light gun). Steel Empira (just like the Japanese version was renewed a couple of months ago), Ferrari Grand Prix (the most crap racing game yet seen on the Megadrive - it's absolute trouser cack), Smash TV, Bart Vs Space Mutants (almost identical to the Nintendo version) and WWF Wrestlingmania.

Hand-helds were strongly represented with Spider-Man, George Foreman's KO Boxing and Bart Vs Space Mutants on Game Gear, while on Gameboy there was George Foreman's KO Boxing, Double Dragon III, NBA All-Star Challenge II, Ferrari Grand Prix, WWF2, Spider-Man II and Roger Clemens MVP Baseball.

Finally, on Nintendo there was WWF Wrestlingmania III: The Steel Cage, George Foreman's KO Boxing and Ferrari Grand Prix. Phew!

▲ Bart's Nightmare Nintendo.

► Roger Clemens MVP Baseball!

▲ Spider-Man on Gameboy

▲ George Foreman KO boxing.

▲ T2 Arcade Game on Megadrive

## ABSOLUTELY TOP-NOTCH

Absolute Entertainment have some very jolly stuff up 'n' coming. Amazing Tennis is one of the best, and is coming soon to Megadrive and Super NES. It features large, beautifully animated sprites, great sound effects and excellent gameplay.

BattleTank on NES is pretty decent, but better still is Super BattleTank on Super NES, which lets you trundle around the Gulf in your vehicle of doom and dish out death to all and sundry. Great graphics and some brilliant special effects makes this look a winner.

Also from Absolute is Race America (Nintendo), which looks and plays very much like an ancient computer game called The Great American Cross Country Road Race. Space Shuttle

CES

SHOW

(Nintendo), a rather dull Space Shuttle simulation and Turn and Burn: F14 Dogfight Simulator (Gameboy) a very promising-looking Afterburner style game.

Finally, Absolute announced that they are currently working on Toys, the game based on a forthcoming film in which a toy maker saves his father's toy factory from the clutches of his loony Uncle. Sounds interesting.

## EGC

The **EGC** Club are giving away over 15,000 worth of products.

e Entertainment

sents

# GAMING CLUB

e Games Club''

**50 WINNERS**  
**needed NOW!**

**How to enter the competition**

Fill in your membership form, answer the 3 questions correctly and send it together with your 12 months membership fee of £12 to the EGC Club address.

All members who have answered the 3 questions correctly will be entered into our FREE draw. 50 Winners will be chosen at random by The Promotion Manager of Advance Console Entertainment. The lucky winners will get to choose anyone of the products shown.

All entries in our draw should be received by the 31st July 1982.  
The winners will be notified by post.

**For more information please phone**

**011 262 1444**

**The BIG DEAL**

**For £1 per month you get**

- EGC Membership Card
- 5% Discount on all Hardware
- 10% Discount on all Games
- The Latest Releases FIRST  
(We supply all the major magazines with the latest releases for review)
- Amazing Competitions  
(Simply check out the first one)
- Exclusive Products only from EGC
- FREE Repair Inspection  
(This service usually costs £15)
- Up-To-Date Information
- Demonstration Set-Up
- Personal Orders  
(Items not in stock can be ordered)

**Don't miss out... Don't miss out... Don't miss out... Don't miss out...**

**Yes**

I want to become a member of the "ELECTRONIC GAMING CLUB" which includes all the benefits the club offers, and a FREE entry into all competitions for a period of 12 months at a special price of £12.

# CE

# SHOW

Mickey Mouse on SNES  
- a stunning-looking game.

## CAPCOM COMETH

Obviously, Capcom's big one - and indeed my personal game-of-the-show by miles - was Streetfighter II. It is brilliant - but you can read all about it after this special news report. Streetfighter II wasn't the only quality product on display - Mickey Mouse's Mystical Quest on the Super Nintendo is fabulous and makes the Megadvice Castle of Illusion look quite poor by comparison!

Another Disney product in the pipeline is Gool Troop, starring Goofy and his chums, Super Buster Brothers, better known in this country as Pang, is a great converser on which improves on the arcade original with a series of tougher screens and new features, while Capcom's MVP Football is everything that Super Nintendo John Madden's Football should have been and more!

On the Nintendo, Megaman 5 is looking brilliant, Gold Medal Challenge is crap, Tale Spin is nice, Gargoyle's Quest II is tasty and Darkwing Duck is great. Gameboy? Sier Wars and Empire Strikes Back are must-haves (for me, at least), Bionic Commando is skill and Tale Spin, Darkwing Duck, Little Mermaid and Megaman III are all ones to watch out for.

## SEGA'S SCRUMPTIOUS

Sega's stand was very impressive this year and there were loads of product on display. Top of the lot was obviously Sonic the Hedgehog II. I tried filming it on my camcorder but was bundled away within seconds by an army of bouncers - as you can see from the pictures. Mind you, I was hardly surprised that Sega didn't want shots taken of the game. The demo was very early indeed and you'd be hard pressed to tell the difference between it and the original version - there was none of the promised handgilding, railcart riding or anything else that might have been. I was disappointed to see no exclusive updates throughout the year - stay tuned.

**Sonic II was on display, but the problem was...**

**...and the bouncers grabbed you when you did!**

Other big names - Batman Returns (the game of the film), Batman: Joker's Revenge (a game based around the original comic), Evander Holyfield (and his boxing game), and the Little Mermaid and Mickey Mouse and Donald Duck (in the fab-looking World of Illusion, the sequel to Castle of Illusion). All those are scheduled to

## TENGEN'S LOT

One of my fave arcade games of this year is Steel Talons the helicopter simulator, and I sped over to the Tengen stand to have an ogle. Sadly I was disappointed - it's very, very slow indeed. Hopefully they'll speed it up before release. If they don't, prepare for it to be shot down.

Road Riot 4WD looks quite nifty. It's not the greatest arcade game in the world, but on the Megadrive the early demo I saw was fun. Ramparts is great - exactly the same as the coin-op - and RBI Baseball IV is quite jolly for a baseball game.

Tengen were also showing MiG 29 and James Bond 007, which will be launched in this country under the auspices of Domark. The 007 demo was very early and

impressions were poor - lots more work needed there methinks. I didn't get to see MiG 29. Doh!

appear on Megadrive, and all but Batman: Joker's Revenge and World of Illusion are to appear on Game Gear.

Original Sega product included Grease: the Surfer Dude (a very weird, but very neat platform game), Streets of Rage II (similar, but with much better, Final Fight-esque sprites), Chakan the Forever Man and B-Bomb.

Sega were also showing off their new Menacer light gun - a direct competitor to Nintendo's Super Scope. It's very neat, as you can see from the picture, and will be released in October with the Terminator II: Arcade Game conversion. We'll bring you a full report later on in the year.

If you were looking for Master System product, the CES Show was completely lacking anything remotely resembling a Sega 8-bit dedicated machine. The problem is that in the US, the Master System has been pensioned off and since all new games are now being programmed in Europe and Japan, there wasn't much call to show it off. That's not to say that there's going to be a Master System software drought - there's still plenty coming out for the machine in this country - but as far as the US is concerned, the Master System is dead.

Game Gear is alive and kicking, though, and along with the games listed above, we'll be seeing Taz-Mania, Chakan: The Forever Man, Ayrtion Senna's Super Monaco GP II (let's hope it's better than the scabby Master System version), Dave Robinson's Supreme Court Basketball, Home Alone 3, Sonic B, Shinobi II, Tale Spin, Wimbledon Tennis, Defenders of Oasis, Chessmaster and Aerial Assault. Wheeeeee.

## ATLUS QUARTET

▲ Blazron - a decent shooter.

I always thought that Wacky Races was going to be a race game. After all, the cartoon series was 100% racing action and there's some amazing potential for hilarious racing action with all these loony cars. Sadly it's not to be and instead Atlus have turned it into a platform game. Fiddlesticks and double dahl I mean, it's not as though there's a shortage of platform games on Nintendo! A brilliant crapped down the pan and no mistake!

Also on Nintendo there's Wigdel (a platform game starring a cute metamorphosing pink character) and Golf Grand Slam, a blimmin' good golf game.

Finally, on the Super NES Atlus have Blazron, a fairly average horizontally scrolling shoot 'em up which features a heavily armed robot.

▼ *Football on Gameboy is a great 4-player game. It's also on SNES as a two-player!*

▲ *Widget - good fun.*

▲ *Wacky Races - wasted.*

## ARE THEY BULLETPROOF?

Football is Bulletproof's big game. It's a first person perspective maze game in which up to four players (on Gameboy with a four-player link) rush around doing one another in. It's simple, but incredibly good fun. The game is also coming out on Super Nintendo (complete with two-player action) - watch out!!

Hats was also shown off on Nintendo and Gameboy. It's a sort of Tetris with hats and is fun at first, but gets boring after a while.

## IREM'S BITS

The big-nama coin-op conversion on Irem's stand was Gunforce, a translation of their excellent horizontally scrolling simultaneous two-player shooter. It looks and plays really well, but suffers really badly in the slowdown department. Bah! Their golf game, The Irem Skins Game as it's cynosically called, is pretty decent and plays a good arcadey game of golf. Dinosaurs was the third and final Super NES game on display, and it looks great. Licensed from the forthcoming Dinosaurs movie, it casts you as the rider of a daad cute dino who must negotiate a hazard-packed platform environment.

Hammern Harry was the only Gameboy game shown off, and it's looking great, packing just as much fun as the original coin-op.

Tecmo have a load of new sports games coming out. Super Bowl and Tecmo Bowl are both released on Nintendo and look great, although Super Bowl is definitely the better of the two. Tecmo Bowl is also Gameboy-bound and apart from some blurry graphics looks like it should be good.

No prizes guessing what Tecmo NBA Basketball is about. Featuring all the NBA teams and Nintendo

## ACCOLADE FIGHT 'N' SHOW

◀ Highly realistic graphics makes Hardball III one to watch out for - as these two pics illustrate!

On the Nintendo front, everything is hunky dory. Super NES has Test Drive II, just as dire as its Megadrive counterpart, but also WarpSpeed and Universal Soldier which both look promising. On Gameboy there's Asteroids, Centipede and Missile Command ready to send arcade goers of old into organic fits of nostalgic ecstacy, and Universal Soldier and StarHawk both announced for future release.

## TECMO GO SPORT MAD

## ENVIRONMENTAL VIDEO GAMES

Magicom software have created a new environmental video game for all major home entertainment systems. Their game, the Environmental Detective, is a platform run-about with the eponymous detective solving various green-related puzzles.

## SONY SURPRISES

Imagesoft had a large line-up of Nintendo product that looked pretty smart. The jewel in the crown was the Super NES version of Steven Spielberg's Hook movie. This is vaguely similar in concept to the 8-bit Nintendo version, but has far superior graphics and sound and the game is a lot more playable too. Hook was also being displayed on the Gameboy too, this version looking remarkably like the Nintendo game.

Other games in the Sony line-up included Extra Innings on the Super NES (a baseball game that looks like a million others) and the okay-looking Soccer Mania on the Gameboy. SmartBall on the Super NES looked quite interesting. It casts you as the eponymous SmartBall, out to rescue Princess Wendy by traversing various Mario-esque platform levels. Hudson Hawk on the NES and Gameboy was also being heavily pushed by the Sony people - check out the Previews section for a lengthier lowdown on the game.

▼ SmartBall - the US Jerry Br...

basketball game yet. The players this looks like the best game is also coming out on Super NES - Tecmo Super NBA Basketball as it's called - and it features similar gameplay, but miles better graphics and sound.

Finally there's Tecmo Cup Soccer, a festeringly rotten soccer

▲ The crappiest game of the show!

Magnum software have created a new environmental video game for all major home entertainment systems. Their game, the Environmental Detective, is a platform run-about with the eponymous detective solving various green-related puzzles.

The player controls the 'Ozone

More baseball - Extra Innings.

game in which you guide a young lad to the world cup via a series of snoozeworthy RPG like sequences. Personally I'd like to see a copy of this dire game stuffed up the backside of whoever invented it. It's awful.

▲ Tecmo Super Bowl!

Kid', a streetwise environmental do-gooder, who picks up trash in his home town, Recycle City and always takes his refuse to the recycling centre. His other numerous antics include stopping spray boxes from making holes in the ozone layer and preventing the rainforests from getting cut down

by evil crocodiles (?). The general idea of the game is to inform children of environmental problems and make them seem like a problem to be solved rather than a deadly threat. Whether the programmers have succeeded in this will be revealed in a future issue of MEAN MACHINES.

CES

SHOW

# CES SHOW

## JALECO JOLLY JAPES

Jaleco have plenty up 'n' coming! Super Basas Loaded is yet another Super Nintendo baseball game which is good but not the greatest. Basas Loaded 3 was shown on Nintendo and Basas Loaded for Gameboy was shown on... well, you've guessed it... on Nintendo's hand-held machine, the name of which has temporarily slipped my mind.

The lastest Nintendo game Goal! appeared in Super Nintendo form, and fortunately it's much better than the 8-bit version. As indeed is Goal! Two on Nintendo. But then again it would be impossible to make it any worse unless you put a rancid turd in the cartridge case.

Rival Turf on Super NES (known in Japan as Rushing Beat) was rather poor, adding a two-player mode to the Final Fight format, but unfortunately forgetting to make the gameplay any good. Earth Defence Force was a good-looking but highly unchallenging horizontally scrolling blaster. Finally on Super NES was Utopia, a brilliant Populous beater that's being converted from an Amiga game launched by Gramline earlier this year.

## IT'S Q\*BERT!

I doubt whether many MEAN MACHINES remember the Q\*bert arcade machine. He was quite a hit in the very early 80s, starring in a game in which you guided him around a forced perspective 3D environment changing the floor to the correct colour. Now he's back on Super NES courtesy of NTVIC in a right wild 'n' crazy game. The original concept has been taken and improved upon to make it a really enjoyable and refreshing challenge.

## NINTENDO'S NICETIES

As you would expect, it was all go on Nintendo's stand. Taking pride of place was Mario Paint, an art package which comes complete with a mouse. It's very good as art packages go, but as we said when we reviewed Art Alive on the Megadrive, console art packages are a bit pointless - you can't really do anything with your pictures unless you have a disk to save them to!

Much more fun was Super Mario Kart, a split screen racing game in which players race against all manner of Super Mario stars, including Luigi, Yoshi, Mushroom and Bowser and his evil chums. The game uses mode seven to great effect, and the game plays superbly.

## CULTURE BRAIN LINE-UP

Four Super NES titles were being promoted by Culture Brain at the show. Among them were Baseball Simulator 1000 (about the tenth Baseball game at the show that looks just like all the others) and Ninja Boy - a sort of exploration game with platform and beat 'em up sections.

◀ Golden Fighter - definitely one to look out for

▲ Power Blade 2 - excellent 8-bit stuff

## SUNSOFT BATMEN

Sunsoft were displaying every version of Batman they could lay their hands on! Three different games were on show - Super NES, Megadrive and Gameboy. Each version looks very good indeed, especially the 8-meg Super NES and Megadrive games. Just like the original Nintendo game, these versions are scrolling platform efforts with extra-special graphics, sound and playability. Watch out for more details in MEAN MACHINES soon.

## SOME GOOD MEGA-CD GAMES?

Sierra used the CES Show to announce their forthcoming range of Mega-CD games. They plan to release versions of their popular PC adventures, but with extra knobs on that only CD can provide.

Both King's Quest and Space Quest received decent reviews on the PC, but the Mega-CD version boasts stirring stereo tracks and voices from 50 different actors! The Adventures of Willy Beamish is another adventure - this time a pea-lake of animated cartoons. It's being designed by artists and writers.

▲ Stellar 7 Mega-CD

Other Culture Brain stuff included the RPG Golden Empire (not a lot of this game was actually on show) and Golden Fighter. Again, not a lot of this was actually displayed, but from the looks of it, this 12-meg game is a sort of Street Fighter II variant with four (count 'em) modes of play. This could be really great but it remains to be seen if it challenges Street Fighter II as the definitive beat 'em up.

## TAITO TAKE FIVE

Those who like ice hockey should enjoy Hit the Ice, a conversion of the Williams coin-op which is available on Gameboy, Nintendo and Super NES. The Super NES version is particularly good, complete with crunch-tabulous sound effects.

On the Ball is a quite original concept which uses the spin-o-matic chips in the Super Nintendo to good effect. The idea is to get your ball out (oo-arr) of the maze by rotating the screen. Simple fun - but for how long?

Another ball-related game was seen in the form of Super Soccer Champ, another Super Nintendo title. Any good? Not really - once again proving that soccer games are best left to European games designers.

On Nintendo Taito have Power Blade II, a graphically superb platform combat game and The Jetsons, a very jolly game of the cartoon series. And that's it for the Taito stand, guys 'n' gals.

behind Jonny Quest (surely not a game about a search for lost prophylactics?) and The Little Mermaid.

Further excitement includes a CD version of the Battlezone-inspired tank game, Stellar Seven, along with more adult orientated CD games like Police Quest. The Kindred, Leisure Suit Larry in the Land of the Lounge Lizards and Rise of the Dragon. All of these titles were pretty well-received by the PC market and we wait with bated breath for the finished Mega-CD games.

## FISHER-PRICE EDUTAINMENT

In the USA, Gametek have released a couple of Fisher-Price licensed games, including Firehouse Rescue on the Nintendo. Aimed at very young players, Gametek plan to teach children number recognition as well as making them compare similarities and differences and hopefully expanding their memory capacity too! It does this by giving the player a firetruck to drive around the city. The player must guide this truck through the maze of streets, than at the scene of the fire, he must bring all the endangered "little people (tm)" down the firetruck ladder.

On display at the CES Show, Fire Rescue looked rather good for an educational game and should keep three to eight-year-olds occupied for quite a while as they fight to work their way up from Firefighter to Fire Chief - I certainly enjoyed having a bash.

▲ Willy Beamish Mega-CD

# ACES SHOW

## NAMCO NINTENDO STUFF

Famed arcade company Namco had a whole bunch of potentially lopper gear on show at Chicago. The best of the lot must be Wings 2. Aces High for the Super NES. Boasting set-of-the-penis flying action and some cool mode seven graphics, this should be one to look out for.

Whirls was another Super NES game on show. Namco reckon it breaks new ground in the action RPG category. The general idea is that you embark on a quest to save a child and his village from a horrible plague. There are over forty different levels and lots of arcade/adventure thrills to enjoy.

Namco were also displaying Super Batter Up, yet ANOTHER Baseball simulations that looks uncannily like all the others.

On the Gameboy front, Namco were pushing arcade conversions of two of their earliest coin ops - PacMan and Dig Dug - both great fun-filled trips down memory lane!

▲ PacMan Gameboy

▲ Dig Dug Gameboy

## SUPER NES

## REVIEW

It was the most talked about game to appear on the Super NES - and that was eight months before it had come out! It's a conversion of the most successful coin-op of all time! It's a game that has the potential to be the most exciting beat 'em up ever to hit the home! As you may have guessed from the screenshots and large logos on the page, it's *Street Fighter II* - the game that started a cult across the globe!

The actual game itself is remarkably simple, at least on paper. You choose one of eight master combatants and your objective is to face up to the other seven participants and slap them about heavily. Each match is composed of a series of rounds, and the first warrior to achieve two wins moves on to the next round. Once all of the other contestants are beaten, you move on to the next set of characters who have already qualified for the *Street Fighter* finals (as you may imagine, these dudes are tough!).

Actually, although it sounds quite simple, *Street Fighter II* is one of the most involved beat 'em ups ever created. Each character has his or her own set of special moves, all activated through combinations of buttons presses and moves of the control pad.

Have you got the necessary skill and coordination to go up against Balrog in the *Street Fighter II* final? Will you be the World Warrior or do you have all the fighting ability of the school apaz, shunned and despised by all?

▲ *Ryu's Sheng Long dragon punch in action! This is at its highest power, but lower dragon punches are available. Excellent for taking out flying foes!*

### 1 FIST FUN

Three different strengths of punch are on offer. Weak punches are very quick to pull off and keep your guard raised slightly, but they do not inflict so much damage on your opponent. Strong punches are the exact opposite. They produce massive amount of damage, but your guard is down and they are not very fast to pull off. Mid-range punches achieve a balance between the two extremes.

▲ *Guile falls foul to a smaller dragon punch courtesy of Ken. Devastating!*

▲ *A close range attack in evidence. If he is close enough, that butt does double damage!*

▲ *Guile practises his range of kicking attacks on a well prepared Ken.*

**YOGA FIRE! SONIC BOOM!**

Range attacks are also possible in Street Fighter II. Ken and Ryu have their patented Cyclone punch which releases a fireball in the general direction of their opponents. Guile has his Sonic Boom, which he manages to send off a lot quicker than Ken or Ryu's Cyclones. Dhalsim has his amazing Yoga Fire. This takes even longer to ignite than Ken and Ryu's Cyclones. Other characters use their bodies as projectiles! Blanka's Cannonball Spin is just as potent as any fireball, as is Honda's Sumo Torpedo.

**RYU: CYCLONE PUNCH**

**GUILE: SONIC BOOM**

**DHALSIM: YOGA FIRE**

**BLANKA: CANNONBALL SPIN**

**THROWING UP**

The key to mastering the game and humiliating your opponents lies in mastering the throw attacks. They seem quite easy to achieve. All you have to do is walk into your opponent with the punch button held down. The only problem is that your foe is likely to attack you in the process! However, once you've sorted out the timing, you should have no problem in sorting out your opponents in this way.

**2 FEET FIRST**

Three different strengths of kicks are also available to each Street Fighter, and just like the punches, there are many different kinds of each. For example, duck and kick and you probably pull off a devastating sweep manoeuvre. Jump and kick pressed down together attempts a flying kick. Only by trying out different combinations do you find some of the specialised attacks.

▲ Dhalsim demonstrates his mastery of long range attacks. Ken gets it in the face.

**FIGHTING HANDICAPS**

So, you reckon you're a bit 'tasty' on Street Fighter eh? Well, perhaps you need a handicap! The Super NES version of Street Fighter II enables players to customise their character, reducing the amount of damage each move inflicts. Cool, eh?

► This Versus Screen allows you to select handicaps, backdrops and characters. Cool!

# SUPER NES

# REVIEW

## TWO-PLAYER ACTION

Street Fighter II includes just about everything that was in the amazing Capcom coin-op, and that DOES include the simultaneous two-player mode! So now you can play the best ever two-player game in your own front room!

## BONUS THRILLS

There are two bonus stages in Street Fighter II. The first is an all-new bonus, not even seen in Street Fighter '92. The aim is simply to knock down a big wall of bricks! The second bonus puts a Japanese motor on-screen, and it's your task to crash as far as quickly as possible!

## THE PRICE IS RIGHT?

Street Fighter II is going to be officially released in Europe later this year (the firmer date has been settled on), but at the moment you can only buy it from grey importers. We got our copy extremely quickly thanks to Advanced Home Entertainment (081 383 0460), who should be selling the game now for around £75, but 'phone up and check first. Some greedy importers are charging around £100 for the game which we reckon is far too much. If you're a Street Fighter fan dying to get hold of the game, go for it now by all means. However, the game will be a lot cheaper (probably around £45) when it is officially released.

### RYU

**HEIGHT:** 175cm  
**WEIGHT:** 68kg  
**BLOOD TYPE:** O  
**NOTES:** The Japanese participant in the championship is very dexterous and armed with all manner of close-up and long range attacks. His fireball punch and Sheng Long dragon attack are moves to be feared.

### KEN

**HEIGHT:** 176cm  
**WEIGHT:** 70kg  
**BLOOD TYPE:** B  
**NOTES:** Ken trained with Ryu, and thus has exactly the same range of moves as his Japanese pal. Very distinctive in his striking red pyjamas, Ken is very dangerous indeed. Learn to use him well and the Street Fighter championship is yours.

### ZANGIEF

**HEIGHT:** 211cm  
**WEIGHT:** 115kg  
**BLOOD TYPE:** A  
**NOTES:** This massive Russian participant has some of the most powerful attacks out of all of the contestants. Look out for his spinning pile driver attack. It's the single most devastating attack in the whole game!

### CHUN LI

**HEIGHT:** 170cm  
**WEIGHT:** She isn't listed  
**BLOOD TYPE:** A  
**NOTES:** Chun Li's rival participant is the deceptively cute Chun Li - out to avenge her father's death by slaying Balrog around a bit. Her speed more than compensates her slight lack of power.

## REVIEW

## TV STREET FIGHTING

In Japan, Street Fighter II is one of the most popular phenomena, even! Along with myriad of merchandise, including a CD, comics and journals, there is also a Street Fighter II TV show! Here, Japanese actors dress up as characters from the mega video game and act out special Street Fighter scripts. The show has just gone into production in Japan and it looks like being a real ratings winner over there!

- ▲ Chun Li's spinning leg attack drains energy even if the opponent is guarding! A formidable attack.
- ▼ The final conflict! Ken lays into Balrog during the final round!

## BLANKA

HEIGHT: 192cm  
WEIGHT: 98kg  
BLOOD TYPE: B

NOTES: More monster than man, Blanka is noted for his amazing speed. His range of attacks, including claw swings, crushing kicks and cannonball punches make this Brazilian combatant a worthy opponent.

## E HONDA

HEIGHT: 185cm  
WEIGHT: 137kg  
BLOOD TYPE: A

NOTES: Another Japanese combatant, Honda has decided to prove that the power of the Sumo warrior rules the world. A formidable close range assailant, Honda's moves are crushingly powerful.

## DHALSIM

HEIGHT: 176cm  
WEIGHT: 48kg  
BLOOD TYPE: O

NOTES: India's entrepreneur, the Street Fighter character has truly mastered the power of yoga, enabling him to warp his muscles over vast distances. He also breathes fire and turns his body in a human spear.

## GUILLE

HEIGHT: 182cm  
WEIGHT: 86kg  
BLOOD TYPE: O

NOTES: A Vietnam veteran (although he was only a five-year-old when he landed) and a major in the army, Guile has developed his own unique fighting style following many years of combat experience. His somersault kick and gonkicrism manoeuvres have wrecked every opponent he has ever fought.

## STREET FIGHTER '92

Street Fighter has moved on since the game was released in 1991! Street Fighter '92 is superficially very similar to the first game, but with a number of important differences. First of all, the player can select to use the last four combatants in the Street Fighter challenge - Bison, Vega, Balrog and Sagat. In two-player mode, the new game also allows you to play the same character against one another - something you can't do in the original game.

# SUPER NES

## REVIEW

Looks familiar? Well, in UK arcades this character is known as Balrog! Noted for his charging punches and awesome power, M Bison is a tough, if slightly predictable opponent.

Spain's champion has an unfair advantage over you - he has a weapon! Special Freddy Krueger-esque clews are attached to one of his gloves and their slashing power is unrivalled. Vega's Rolling Crystal Flash, Barcelona Attack and Izna Drop make him a dude to treat with extreme caution (when you're not smashing his head in!).

The master of Thai Boxing! Segat has honed his skills to the max and is a very worthy opponent. He has extra moves like the fiery Tiger Shot, a Grand Tiger Shot, and his feared Tiger Uppercut. You need total control over your character to beat this guy.

Belrog is the master of mystical magic! This enables him to burn his opponents by literally turning his hand into fire! Belrog is the toughest opponent in the game. Attacks like the Psycho Crusher, Double Kneel Press and the Head Press only serve to confirm this.

### RICH

This is the game that everyone has been waiting for and I'm highly relieved to report that it's 'kin ace! Everything from the coin-op is here. Every move, just about every tactic, all the backdrops, every character - it's ALL here! We've got the Street Fighter II coin-op in the office, and the only tiny differences seem to be in the animation and the speed of the game - the amazing playability of the original remains intact. I guarantee you months of fun with the two-player mode as you try to learn all the moves with every combination of characters going! The vast range of options makes the presentation of the game even better than the original - the Versus Mode even lets you choose the backdrop you wish to fight on! I cannot stress how much of a cool game Street Fighter II is, it's a dream come true for Super NES owners! In fact, I would go as far as to say that Street Fighter II is even more playable and exciting than the classic Super Mario World - making it one of the greatest video games in the world today!

### COMMENT

### JULIAN

What surely must be the greatest ever arcade machine has become the greatest ever arcade-to-console conversion. It truly is mind-bogglingly good! Apart from a few minuscule differences - none of which affect the gameplay in the slightest - this IS Streetfighter II. The sound, sprites, animated backgrounds and gameplay are all spot-on, so much so that once you're used to playing with the Super Nintendo control pads (which doesn't take very long since you can select which buttons do what) you actually think you're playing the arcade game! All your favourite tactics work, everything reacts in the same way, all the moves are present... everything is perfect! Incredibly, Capcom have also added some new features not present in the arcade machine - a new bonus screen and a whole load of options which allow you to handicap yourself or other players, select the background and change the difficulty settings. I could continue to rant and rave about just how completely superlative this game is, but let me tell you one thing: I've played this more, had more fun and still enjoy it more than any other game I've played in the last ten years. It any game was ever going to sail the Super Nintendo, Streetfighter II is it...

### COMMENT

## PRESENTATION 98%

A huge amount of options to try out makes the presentation excellent

## GRAPHICS 95%

A stunning range of arcade-perfect backdrops and sprites, all boasting jaw-dropping animation and style

## SOUND 93%

The tunes aren't quite as good as the coin-op's, but just about all the speech and effects are there

## PLAYABILITY 98%

Getting into the game is extremely easy and the combat action is unrivalled by any other beat 'em up

## LASTABILITY 97%

Mastering every move on every opponent takes ages, as does completing the game

## OVERALL 98%

A completely amazing conversion of what must rank as one of the greatest coin-ops of all time. An essential Super NES game

Nintendo

Yo dudes, fancy checking out the latest dweeb free zone and saving the residents of downtown Jemmerville from terminal damage?

Only serious gamers will come close to hanging out at the top of these nice 'n' big towers - each threatening to demolish this fine and dandy nation

All kinds of dodgy lowlife will be out to get you - make the eighth tower and if you're not set on the edge of your seat or drowning in a pool of sweat, then check your pulse, you're definitely dead!

“ Should be as big a hit as *Nebulus GB Action*. A towering Game Boy title and loads of fun *CEVG*. Looks like being an 8-bit classic *Mean Machines*. ”

# MEAN YOB!

The burning deck, picking his nose like mad. He rolled it up in little balls and threw them at his dad. Little robin redbreast sat upon a pole. Wiggle went his tail and pop went his... er... bottom. Now we've finished that fine literary timber up, we're ready for the real hardcore stuff - YOB's

letters page. If you've got anything interesting, funny, poignant to say - whatever it is, we don't care - send it off to: **SWINGY DANGLY HANGING SACKS OF DOOM MAILBAG, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGTON LANE, LONDON, EC1R 3AU.**

▲ Danny Philips of Exmouth sees to Rad's demise!

by the Megadrive. Surely the way that consoles should be viewed is by the quality of the games not the quantity. Another way that you managed to put the SNES down was by bringing in the Master System Converter and saying that it doubled the Megadrive's library. Well I am sorry but it is rather stupid saying that you can't get a NES converter. In my opinion Nintendo were rushed to get the SNES in the shops so that they didn't get totally annihilated by the Megadrive. Give them a chance! They will bring out better games that will just blow away most of the Megadrive games. Sorry for complaining, I just thought I would say my piece.  
**Moaning man o' misery,  
Corstorphine Edinburgh  
YOB: Yew!** Obviously you didn't read the feature properly. The Super NES actually tared very well. The fact that there's very little software available for it **MUST** come into the equation. There's no getting away from it,

so don't be silly and just enjoy your machine for what it is - you obviously like it and are happy with it, so why moan to us about it?

## A BORED(ING) SCHOOLGIRL WRITES

Dear YOB

Since you said in your last ish that girls are lazy I decided to grab my pen and write to you! And you had better be grateful and reply because I could be revising for my GCSEs now even though they aren't for another four terms, ha ha! About how much mail do you get? 'Cos half of the letters you print are from whinging yabbas arguing over their computers. I have a Megadrive and an NES and I am not going to argue like half of the other losers who do. I got your mag today and it's brill as usual but I am broke now but who cares? 'Cos life is wonderful at boarding school, with no consoles only BBCs and Tandons which are crap! If only school could look out some dosh and get us a Street Fighter II machine rather than spend it on things like cushions! £250 spent on big cushions for our common room which is now a geography room and the cushions have been burnt! Let's face it, boarding school is a dead laugh but it is a dump like here, drop a bomb on it and save all the slaves who have to do things like scrape Marmite off tables and name socks and towels. So, save our asses! Sara Riley (AKA the bird in the hafe), M school, York

YOB: To think, your parents are

▲ A prehistoric artefact from Tom Percival, Shrops.

## WACKY CRAZIES

Dear YOB

Stop that pigeon now ool  
**D Dastardly Vulture Squadron  
YOB: No medal for you, mate.**

Dear YOB

I would like to complain about the

special feature on the Megadrive and SNES. It was totally unfair towards the SNES. You kept raving about the amount of software for it, saying that the Megadrive was better, although not in so many words. Obviously the Megadrive is going to have more games out for it considering it has been out for about 20 months. But in the SNES' case it has been out for about 3 weeks. Even at that, the two games that are out for it couldn't be handled

THE VIDEO FRUIT  
CANDY BOX  
(LARRY BIRD)

#### ▲ A worrying montage from Mr Unknown

spending a fortune each term sending you to boarding school, end all the school can give you in this way of videogaming-related entertainment is BBC's and Tandons. That's a disgusting indictment of education today. Write to Thai's Life immediately end make sure your school's board is publicly flogged for their sins.

The messenger from hell sent by M Kyriecou, Kent

#### CONNED!

Dear YOB

I have been reading your great mag for nearly two years now and have always thought the SNES was the best, and was planning to buy one. That was of course until about September of last year when one of my friends told me I should save my money and buy a GX4000 console as they had better capabilities and more games available. He kindly offered to sell me his, telling me it was because he needed the money to pay off the bailiffs. I handed over

#### ▲ A warning from John Fowler of Braxbourne

the £80 and took the sleek white console back to my house. I stayed up all night playing some of the amazing games such as Gazza 2, Pang and Burning Rubber. By the morning I was knackered and had begs around my eyes, but was ecstatic about my 7th place on the first race of Burning Rubber. I staggered down to school and started boasting about feat I had achieved. To my disappointment everyone began to laugh at me and wouldn't talk to me and giggled about me being a gullible sad case. Even the boy who had sold me the console denied ever knowing of the deal and started laughing too. I miserably trudged my way home, dejected and unhappy. I was swindled by someone I had trusted, paid £80 and been laughed at. I would like to warn anyone out there who is thinking of buying a console off a mate to make sure that person is reliable. I trusted that boy and I was had! Marc Kuzak, Stroud, Glos

YOB: Doh!

#### THE PENNY (OR TENNER) DROPS

Dear YOB

I have been the owner of a Megadrive for over a year now and have only recently realised that I've been spending too much money on my games. Up until a few months ago, I'd been spending £35 to £40 on my games and had to save for a long time for each one. But all that changed when I bought a Japanese converter, it only cost me £10 and since then

I've been able to buy Japanese games at cut down prices. I bought Sinder for only £25, in the UK it would have cost me £45. There are plenty of other games at cut prices like ESWAT and Hellfire, possibly the best shoot 'em up on the Megadrive. Both of these cost only £20 each! All you Megadrive owners out there without a Japanese converter, take my advice and buy yourself one soon.

Simon Weaver, Stourport, Worcs  
YOB: There's not a lot I can add to that...

#### PC PRAT

Dear YOB,

In our house we have a Megadrive, a fully souped-up IBM PC and a Spectrum +2 (it's my sister's - honest!) but recently my brother bought a SNES and keeps hogging the TV with Super Mario World. Now you're probably thinking this is a plain old boring "Which is better: The Megadrive or the SNES?" letter. Well in fact it's got nothing to do with the

Megadrive - as good as it is. It's a PC vs SNES letter.

Now I will be the first to admit that the SNES is a fine piece of technology and Mario 4 is very good but I don't think they compare that favourably with the PC and The Secret of Monkey Island 2.

If we look at the machines first we see that the SNES has 8 channel stereo sound, but the PC can have a maximum of 16 channels with digitised sound. The SNES seems the best graphically, for action games, but the PC in VGA mode can produce the best still pictures - well I've never seen better.

If we look at the two games mentioned, both are very playable and Mario is tougher. Monkey 2 however has better graphics and superior sound thanks to Lucasfilm's MUSE system, but they are my own personal opinions - and of many other mags. Paul Phelan, Brooklands, Manchester  
YOB: Yeah, but have you seen Monkey Island 2 on a leebie

# MEAN VOB!

pressed the start button, and what did I see? The biggest load of pants I have ever seen! I couldn't believe it, I was expecting something like the Megadrive version but with better graphics and sound. I was so tipped off, after all the hype about the 'EASN ball cam' which in this is jerky and blocky. So can you shed me some light on how Nintendo gave EA permission to produce such crap on a fabulous console. A sad day for SNES players everywhere Mr A D D

YOB: I don't know why the game was so utterly hopeless - we were gobsmacked at its sheer brown trouser stainedness. But one thing we can all learn from this experience is no matter how good the game is said to be, or how reputable the manufacturer is, always, always, always look at the game before you buy it. Cos you never know when there's crap in the box.

## TO GREY OR NOT TO GREY

Dear YOB  
Here's a sensitive subject for a magazine associated with a grey importer (GI) GIs are ripping the kids off. I am amazed that GIs are still offering Gameboys, Megadrives and Famicoms MINUS a number of extras (leads, batteries, games) around the same price as the official version. Six months ago GIs were selling Famicoms with nothing at £300, and now Nintendo release the official version with everything for £149. News pages create a market for a GI, who makes a fortune 'dangling the cherry' before the young punters eyes. So we do have free enterprise, but you have

▲ Hair raising action from a namelass cartoonist

to advise people that a Famicom does not devalue 50% in six months, and this and other reasons should tell people to avoid GIs. In my opinion, unless you have/want a PC Engine (why?) or speak Japanese, avoid GIs. With a little patience, you don't line GIs' pockets, get a proper warranty and English instructions, and a PAL/SCART system all in one! Dr Andrew Roberts, Edgbaston, Birmingham

YOB: You are the punter. You have control over your wallet. It's up to you to decide what you want to buy and what you don't want to buy. If you want to get stuff from an importer, buy it. If you don't, you don't have to.

Nobody's forcing you to do anything. It's a free market - if people want machines six months before they're available in this country and are willing to pay the price, so be it.

## I SPANNED IT!

Randeer YOB  
I am most disappointed that your magazine does not have features and interviews with cheese. If you did this it would be the hottest piece of literature in the history of the universe and time. I am a member of the cheese clan of which there are 600 members. They all say your mag is great but needs cheese. It is a fact that 6 out

of 10 people have a fetish for cheese - even famous TV stars. Thora Hird, Ruth Madoc and Magnus Magnusson to name but a few, all have cheese fetishes. All of the previous have even advertised for cheese. But poor comedian Lenny Bernel gave up eating cheese and then found his career slumping from peak-time viewing 'Punchlines' to early morning 'Lucky Ladders'. Even politics has its cheeseers, like John 'cheese lip' Major and Neil 'cheese head' Kinnock.

So you can see the need for cheese in computers. Donald McJames, Long Buckley, Northants  
YOB: Knob.

NEW FROM NINTENDO

He might well be horribly jetlagged from his trip back from the US, but Jazza still has the energy to answer your questions in this fine and most magnifique Q+A section. If you've got any questions you want answered, write in to the man with the know (as opposed to the "no"). The address to send your letter is: **PLEASE GIVE GENEROUSLY TOWARDS THE BUY JAZZA A HONDA NC30 FUND, O+A, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGTON LANE, LONDON, EC1R 3AU.**

## IT'S A RUM DO!

**Dear Jazza**  
Being an avid Genesis games player, I was wondering if you could answer my simple question. On Sega's "100 reasons to buy something Mega" advertisement, why are there screen shots from Master System games? I've

spotted six screen shots which aren't mega!

*Rosie Geiges, Paisley Park, Minneapolis, USA*

**JAZ:** I suppose the fact that there's a Master System Converter available for the Megadrive means they can put down Master System pics if they like, you eagle-eyed devil you.

## SHAET!

**Dear Jaz**  
Help! I am a Megadrive owner with some money to spend, but I can't decide on what to buy, so could

## AH! SOLES FOR LUNCH!

**Dearest Jazza**  
Please will you answer some questions for me

1. Which of the following games will be appearing on the Master System: Road Rash, Streets of Rage, John Madden '92, Desert Strike?

2. If so, when?  
*Tom Colles, Northampton*  
**JAZ:** Only Streets of Rage, and that'll be next January.

you please answer my questions.

1. The CD Rom unit sounds interesting, but the first few releases look a tad disappointing. Do you think the quality will improve in the near future?

2. The SNES also seems exciting, but apparently has some sprite problems (due to its rather slow CPU). Does this slow down occur in many games?

*Garsten Brandt, Denmark*

**JAZ:** 1. Yes, definitely. I've seen some of the stuff that's coming out later this year and it's awesome! 2. Only a few.

## ARE THESE EMMA FREUD'S

**Dear Jaz**

Please will you just answer these quick questions

1. Will Final Fight ever be seen on the NES?

2. Will there ever be any cycling games released on the NES?

3. Please could you just tell me about a couple of great games for the NES that are worth the money?  
*Jamie Scott, Rushden, Northants*

**JAZ:** 1. Nein. 2. Nein. 3. Nein. Oh no! Here comes the police!

## LEBANESE FUN!

**Dear Jaz**

I've been writing for a while now so please could you print this letter.

1. Is Lemmings good on the Megadrive and is it coming out in America first?

2. It the SNES has a palette of 32,768 and the Neo Geo has 65,536, why can't they display them all?

3. Last one: Would you please say "Hi" to Martin Kenny who is my best friend and is moving to Ireland?

*Alan Pennell-Smith, Fat Bloke JAZ:* 1. Yea, yes. 2. They can, but it takes up loads of processor time. 3. "Bye".

## HA YOU FEEL?

**Dear Jaz**

I own a Megadrive and am thinking of buying a SNES. Would you please answer these questions for me.

1. Which version of the SNES would you advise I buy, the official British version or the American one? Why?

2. Is there any chance of a decent snooker game being made for the Megadrive?

3. Will Final Fight and Contra Spirits definitely be released for the English SNES and do you have any idea when?

4. What is Rad's honest real name?

*Jamie Bradbury, Beeston, Nottingham*

**JAZ:** 1. It's up to you, matey. 2. Yeah, Jimmy White's Whirlwind Snooker is currently being programmed. 3. Yea, later on this year. 4. Richard Chease.

## A SHRILLED SAUSAGE

**Dear Jaz**

Please could you answer my questions.

1. Are there any more Disney games in the pipeline?

2. Will there be another best of MEAN MACHINES? If so, when?

3. Are there any decent beat 'em ups being programmed for the Megadrive?

4. Will there be any two-player platform games out in the next few months?

*Alister Hunter, Antrim, N Ireland*

**JAZ:** 1. Yeah, check out the CES show report elsewhere in this issue. 2. Yeah, at Christmas. 3. Streets of Rage II is looking promising, as is Fatal Fury. 4. Not in the short-term.

## MELON CAULI

**Dear Jazza**

Please could you answer these

questions for me

1. Will Lemmings come out on the Gameboy?

2. Will you be able to use colour Gameboy cartridges on the original Gameboy?

3. Will New Zealand story come out on the Gameboy?

4. Is Ninja Boy on the Gameboy any good?

Robert Beaumont, Worcs

JAZ: 1. Yap. 2. No. 3. No. 4. No.

## ETHEL'S WILLY RIP

Dear Jaz

Could you please use your wealth of knowledge to answer the following questions

1. Will the ace coin-op Crude Busters be appearing on any consoles, and if so which one and when?

2. I read in another magazine that the official SNES will come with the games Plotwings, Super Tennis and Super Soccer as well as SMB4. Is this true or a load of dingo's kidneys?

3. When the hell is Megaman 3 coming out officially on the NES? It has been out in America for years!

Scott Baker, Wolves  
JAZ: 1. Where have you been? Two Crude Dudes AKA Crude Busters is already out on the Megadrive! 2. Get trying them kidney's boy! 3. Sometime during the Autumn.

## A GIRLIE PURSE

Dear Jaz

1. When is UN Squadron appearing officially for the Brian SNES?

2. How many levels have you found on Super Mario World?

3. Which in your opinion is the best

F-Zero?

4. In Super Tennis when you change sides the court revolves. Is that sprite rotation?

James Tidstone, Gwent, South Wales

JAZ: 1. September, 2. 96 - but I'm a smartass. 3. F-Zero. 4. No. It's background rotation.

game out of Super R-Type and

## WHERE'S THE SOAP?

Dear Jaz

I have a few more questions about the SNES

1. Now that EA will be turning their talents to the SNES, will I be seeing a conversion of my fave Megadrive game of all time, EA Hockey?

2. Will they also be doing conversions of John Madden '92 and Robocop?

3. Should I buy Super Soccer on the SNES when it comes out? 4. I was truly shocked to read about the SNES version of Pitfighter. I just can't understand why a brilliant conversion wasn't made. They even managed to bang together a half decent Megadrive version. I know the SNES can handle this so why hasn't it?

Robin Norton, Davenport

JAZ: 1. I saw SNES EA Hockey at the CES show, and it looked identical to the Megadrive version. 2. Neither are scheduled for conversion as yet, but I wouldn't rule out the possibility. 3. It's up to you. 4. Crap programming and dreadful quality control maketh the disastrous game.

## HIGH RISE

Dear Jaz

After reading your brilliant article in issue 20 on SNES Vs Megadrive, me and my friend still seem to have differing views on the machines. He thinks the Megadrive is better whereas I think the SNES is better. So could you please answer the following questions for us:

1. Which has the best graphics, sound and which is the best overall machine?

2. How much will a SNES game cost? I've seen F-Zero, Super Tennis, Super Soccer and Super Rallye for £40 but my friend still thinks they cost £45

3. Finally, has Streetfighter II (SNES) got better graphics than Two Crude Dudes and Streets of Rage (Mega) and is it generally a better game than them both?

Keith Milner, Wokingham, Berkshire

JAZ: 1. I can't be bothered to go into it again. Read the feature

properly - the answers are before you. 2. It depends on the shop. 3. Yes.

## FOUL AXE!

please answer them?

- 1 Will my official SNES work USA SNES carts without an adaptor?
- 2 Does Final Fight contain all six arcade levels?
- 3 What is so special about the YB King joystick for it to cost so much?
- 4 Will the Super Scope work on the official UK SNES?
- 5 Is there a UK Jap converter for the SNES? If so, how much does it cost?

Paul Morris, Walsall

JAZ: 1. Ney. 2. Nay. 3. Dunno. 4. Yea. 5. Scan the import ads for prices and availability.

## FRYING TONIGHT!

Dear Jaz

I bought a Megadrive about a month ago, and I am extremely perplexed by the games market. Since I am on a tight student budget I oft price games of £35-40 are out of my price range. I've noticed in mail order ads that Jap games are considerably cheaper than UK/USA versions. Would you recommend I get a Jap converter and buy these games or are there hidden disadvantages?

Jonathan Gyngell, Bedfordshire  
JAZ: With older games there are no real hidden disadvantages other than Japanese

instructions. The only other thing to watch out for is that some newer ones don't work on British Megadrives, so check out the compatibility before you buy.

I am fifteen years old, and have a year left at school. I am interested in taking up a career in journalism, particularly computer journalism. I would like to know what particular qualifications you and the other MEAN MACHINES staff writers achieved. Do you enjoy your job? There must be a lot of overtime involved in the job, but you all seem to have a great laugh (except Gary Harrod). Would you recommend a job in journalism?

L.M. Flaherty, Wolves

JAZ: A brilliant writing ability is essential, rather than concrete qualifications. But that's not to say that it's not hard work. A brilliant writing ability is usually a by-product of hard work at school and college. It's a fun job and is one I'd recommend to try (but then I'm biased), but it's not all fun - it's very tough. We'll be running a feature on this line of work in the not-too-distant future, so keep your eyes peeled.

## FISH, CHIMPS AND MUSHY BEES!

Dear Jaz

I am thinking of buying a Master System II and would like you to answer these questions

- 1 Will Road Rash or Desert Strike

ever be released on the Master System?

- 2 What do you think of the following games: Donald Duck, Outrun Europe and Golden Axe?
- 3 Finally what do you think of

these extras: the Sega rapid fire unit and the Sega control stick?  
Nick Minchin, Harpenden, Herts  
JAZ: 1. No. 2. Great, ok, graat. 3. Jolly and jollyish.

## IT'S A DOG'S LIFE

Dear Jaz

I have some questions that I hope you can answer.

- 1 How much will the Super Nintendo joypads cost separately?
- 2 When will the Super Nintendo CD system be released?
- 3 Will there be a light gun for the Super Nintendo?
- 4 Can you connect the Super Nintendo to an Amstrad CPC-464 monitor?

Sam Lewis, Surbiton, Surrey

JAZ: 1. About £10-£15. 2. Next year. 3. Yes - we covered it last month. 4. No-o-o-o-o.

## WHO'S HUW JANUS?

Dear Jaz

I am another one of those PROUD Megadrive owners. Anyway please please please could you answer these questions for me

1. When will Aliens 3 be out for the Megadrive and is it any good?
2. Which game would you

recommend, Sinder or Decapalack?

- 3 Will Sonic 2 be a two-player?
  - 4 Is Bioship Paladin any good?
- Alex Manning, Oulton Broad, Lowestoft  
JAZ: 1. Read the preview later on this issue for all the details 'n' stuff. 2. Strider I suppose. 3. Yes, but not simultaneous as far as I know. 4. It's okay, but nothing to wet your knicks over.

# MEAN

Welcome to the **MEAN MACHINES** Tips Section, the part of the mag that we see fit to devote to helping you lot get the most out of your games. In this month's special, generous helping of tips-related malarkey, we've got amazing sections on the Super NES version of *Smash TV*, along with the full low-down on the Game Genie - the ultimate cheat machine for the Nintendo! Remember that there's £150.00 worth of software for the best tips so send your stuff into **MEAN MACHINES TIPS**, **MEAN MACHINES**, Priory Court, 30-32 Farringdon Lane, London EC1R 3AU.

## The Duel TEST DRIVE II™

This "cheat" enables you to find a secret options menu in the game. It's quite simple really. All you have to do is simultaneously hold down **A**, **B**, and (no surprises here), **C** whilst driving. This option screen should now make its appearance in all its highly useful glory.

Robert Cooper from Epsom in Surrey utilised the postal service to good effect when he decided to send in this *Test Drive II* discovery in to us

Paul Worthington (for it is he), who hails from Manchester is quick off the mark, providing some topper hints 'n' tips for this decent enough platform game.

Turn on the machine and leave the demo running until the **MANIAXE** character appears. Start the game and go to the first bonus stage, "Elsewhere". Collect the Cyclone helmet and exit to under the skull mountain level. Go down the first slope (with the spikes at the bottom) and on the second slope jump up and hurricane along the top of the screen until you reach a small gap. Go into the

room and smash the blocks to receive 50,000 points!

Return down the passage you entered and the screen should freeze and start to flash various colours. You should now be at the "Woods of Despair" level! You should also have six lives and a massive 1,000,001 points!

Mr Worthington also has another interesting tip. It involves you first completing the first stage in under 20 seconds to receive a speed bonus of 10,000 points. Also, if you do not collect anything, you get 5,000 extra points! Yay!

## TIPS

## GOLDEN AXE II

Christopher Patt from the strange part of the world known as Barmouth in Gwynedd sent in this useful piece of info for Golden Axe II!

Hold down A when you fight any end-of-level boss. Do not let go

until you have beaten him and enter the bonus stage. You can release the A button now, but don't kill off any of the little wizards or take any magic books. Now when you are on the next stage you can use spells whenever you like!

Here's a tiny tip designed to help those honest Robocod players get an even more bigger score. The general idea is that you collect all of the goodies on the outside of the castle, enter a room and

complete it. By this time, the goodies should have been reset, enabling you to collect them again for some more points-related tomfoolery. Thanks to Mark Milne from Fife in Scotland for that

## SEGA

## DONALD DUCK

This is an invaluable tip for the amazing Donald Duck: The Lucky Dime Caper. Whenever you come to a pot that bounces, break it open to reveal a power-up goodie. Collect the bonus and then walk back a little (about a screen should do it) and return. The pot should now have returned, enabling you to repeat the process! You can do this as often as you like (every second pot holds a bonus) and you can use this to stock up on your lives! Not surprisingly, this makes finishing this game a whole lot easier! This tip was sent in by the man Mark Milne from Fife (that's in Scotland).

GHOULS  
'N'  
GHOULS

Here is a priceless piece of A1 info from L. Count of Walcott. When the monsters are falling onto your knight in this scrolling platform game, press PAUSE and hold down the B button. You do move slower, but on the other hand, you cannot die!

"Dear MEAN MACHINES," writes Craig Brand. "I have completed Bart Vs the Space Mutants for my NES and have managed to get a few cheats for it."

### LEVEL ONE

Jump on the 'phone seat and select the coin to ring up Moe's Tavern. Remember to buy the key, whistle and magnet. The key (if used outside of the retirement home door) warps you to another part of the level. It has the same effect if used outside of the block of flats too. Use the whistle underneath the last window of the window of the retirement home to get some cash out of Grandpa Simpson (??).

### LEVEL TWO

Jump up three times on the third piece of candy at the first cement section to take yourself safely across. Collect the coins from the first bin after the cement then jump on it again to get a 1-UP. This also works on the first bin after the second escalator, but jump on it three times. Try this on the bin between the magic wands as well. Remember though, you MUST collect the coin or wait around until it disappears.

### LEVEL THREE

Select the magnet before playing the numbers game so you will not lose. On the big Krusty face, fall off the red platform onto his chin to collect the 1-UP. Then jump up and you should go down his throat to enter a fine bonus coin stage.

### LEVEL FIVE

These are the combinations for the nuclear power plant. Use these to complete the game. However, you MUST rescue Maggie in level five because you use her dummy when you take care of the last fuel rod.

# THE SIMPSONS

FLOOR ONE: 14  
FLOOR TWO: 32  
FLOOR THREE: 11  
FLOOR FOUR: 41  
FLOOR FIVE: 21

# LOW G MAN

A couple of months ago, I printed loads of Low-G Man codes, as sent in by Andrew Biggin from Rotherham. Well, a couple of days ago I unearthed his letter again and thought you might like some of the other tips he proffered, most notably tips for every end-of-level boss. There's lots to digest here, so I'll only print half of these tips, and save the rest until next month.

### ROBOCRANE

To defeat Robocrane, you can blow the top part off with the walker vehicle you commandeered earlier. Now just jump on top of the crane and stab the driver with your spear.

### LUMPY

Easy! To defeat the bizarrely monickered Lumpy, just freeze him and stab him with the spear. A piece of cake.

### METAL HEAD

To defeat Metal Head, freeze the two moving platforms and then jump on to them. Once you're

there, jump onto his shoulders and freeze the guns. Destroy them and then jump on to his head and keep stabbing down.

### AIR SWIMMER

Air Swimmer is very easy to defeat once you know how. Just use the boomerang as this hits him up to three times. Concentrate on dodging the icicles and you should be okay.

### SPIRON

Spiron is a tad trickier than most of the bosses the game has to offer. You need to keep freezing him and then attacking him with your spear. Failing that use all of your weapons on him in one deadly assault, and if that doesn't finish him off, it's back to the spear.

### SUPERSUB

A bit of trial and error is required here as you need to find a spot where you can't be hit by the alien's bolts. When the sub dives down he should miss you and you can skewer him with your trusty spear.

# SUPER STARTERS FROM NINTENDO

Nintendo®

The Challenge Set with Super Mario Bros. 3. £79.99.

The new NES Sets from Nintendo are the ace way into the hottest gaming action around.

You've got the Challenge Set, complete with the award winning Super Mario Bros. 3. Or you can go for the double fun of the Promotion Set, with the original Mario Bros. and smash hit Solar Jetman.

And don't forget, there are loads of other NES titles to try,

with more coming out all the time.

**£79.99**

FOR EITHER THE CHALLENGE SET OR THE PROMOTION SET.

The Promotion Set with Super Mario Bros. and Solar Jetman. £79.99.

# TIPS

# SMASH TV

These topper tips from David Jeffrey from Glasgow were supposed to appear in our fine Smash TV maps special, but unfortunately, we lost the letter and have only just rescued it from the murky depths of the MEAN MACHINES trash can. Still, this mege tip enables you to add extra lives and continues to the game!

Go to the player/skill selection screen and push the D-pad down to the skill level selection. Now press and hold the L button and while you are doing this, press and hold the R button. With these buttons depressed, push UP on the control pad. Now you will hear a "bingo!" and a screen should appear that lets you increase your lives and credits!

Also, you might be interested in this fine Smash TV sound test. Just go to the player/skill selection screen and press the two top buttons on the pad in this order: L, R, L, L, R. Once again you will hear a "bingo!" and the sound test screen should make itself known.

# SUPER MARIO

This game is crying out for a massive tips special, but before we can get that together, here's a whole host of topper tips to keep Mario friends going. These tips enable you to locate all of the coloured switches. Sometimes you might come across an empty brick which has a coloured outline. Find the right switch and these blocks fill themselves and often contain useful power up goodies. Here's the location of all of them (apart from the yellow one, which is ridiculously easy to locate after all). After that are some more extra special tips.

## BLUE SWITCH

This is a key room (that is, you need a key to enter it) and is found in Forest of Illusion Two. Find the ? block on its own, halfway through the level and at the bottom of the screen. Walk to the left and you go through the wall. The keyhole is here.

## GREEN SWITCH

Find Donut Planes Four (it's underground) and go up the green exit pipe. At this stage you'll need a cape. In the room you arrive in, there should be four blocks going up. About where the fourth one is, look out for the key and keyhole. This are located directly above this position.

## STAR WORLDO ZONE

Get to the bottom-most Star World (number five) by finding the secret room in Bowser Valley Four. Obtain a blue Yoshi from Star World Two and enter Star World Five. Eat a Koopa and keep Y pressed down whilst flying. When you reach a platform three blocks

Christopher Pell from Barmouth in Gwynedd sent in many tips for publication in this fine tome that is MEAN MACHINES. The cheat for Super Off Road grants you infinite continues. All you have to do is start a two-player game, but DON'T use the other player! Simple.

# RANMA NIBUNNOICHI 1/2

The neatly alternative Francis Fung sent in this amazing set of tips for Renna Nibunnoichi 1/2!

In the one-player mode, you can select any one of the eight characters by holding down the L and R buttons on top of the Super NES controller. Just keep these pressed down and move LEFT or

RIGHT to select your character!

Also, in one-player mode, you can even choose your opponent by repeating the same process I described earlier, but using joy pad 1w0!

If you have selected the same character as the one you want to fight, you can't start the game by

# MARIO WORLD

long next to three red Koopas, land on it and spit out the old Koopa. Get a new one from the three mentioned earlier and fly upward to reach the secret keyhole and ready yourself for a whole new challenge!

## VANILLA COOME WORLD

You need the red switch activated for this. Proceed through the first level in this area as normal until you reach a "ladder" of red I blocks. Hit the climbing plant block and "voilà" as those cheeky French chaps might say at this juncture.

## EXTRA LIFE BONANZA

Find Star World Two. As you enter, pick up the star and proceed to touch as many enemies as you can. After hitting a few, every one you hit gives you an extra life. Hit the next block to get another star and repeat the process!

pressing START. However, you can solve this problem by holding down the L and R buttons again, this time in conjunction with the A button! Do this combination with joystick one.

Finally, on two-player mode, both of you can use the same person to challenge each other. First of all, choose the same characters as per the usual method, but player one (who presumably is using joystick one) has to hold down L and R and press A to start the game.

# -SIM- CITY

This is yet another tip from the man known only to us as 'David Jeffrey from Glasgow'. This little cheat enables you to get more maps on the Super NES version of Sim City.

All you have to do is select **START NEW CITY** on the menu screen and then choose any map number between one and 999. OK the map you want. Go into the map and choose the **GO TO MENU** icon at the top of the screen. Do NOT save this. Instead, choose **START NEW CITY** again on the menu screen. Well, and the same map that you chose earlier will turn out to be a new map with the same number! This works on any map, giving you a total of 1,999 screens.

## SUPER NES

## TIPS

# SUPER TENNIS

underland AFC rule! Nr it least, so it says on Philip Anderson's letter to the Tips Section. Let us hope that these tips for Super Tennis are a little more accurate. They give you vital info on every major championship the game has!

## RIO

Don't bother entering this. The rewards just aren't worth the bother it causes your player.

## MELBOURNE OPEN

Enter this tournament. It's on the hard court (which has the highest bounces - ideal for beginners) so it's quite easy. The top players enter though, so this is a good chance to test your skills.

## NAIROBI OPEN

This is a good tournament to enter and gain points in quite easily. It's played on the lawn and not many top players enter, so it is fairly easy.

## PARIS OPEN

This is a hard tournament as it is played on the clay court. This is a major tournament, so if you're not very good you'll better start practicing (grat tip, that one - Rich).

## BEIJING OPEN

This is an easy tournament, but not worth playing as your player is already tired from the last three events. Save your energy for the next.

## LONDON OPEN

Wimbledon! Definitely have a go at this one. It's on the lawn court and all the top players enter. This is a good test for those who think they've honed their skills to the max.

## TOKYO OPEN

Enter this tournament as you should find it quite easy. It's on the hard court and not many top players enter this event.

## NEW YORK OPEN

The last tournament on the circuit should be attempted. It's on the hard court and ALL the major players enter. It's definitely a difficult challenge, but if you win, you are treated to a mega end-sequence. Hurrah!

# DONALD DUCK

Here is the complete lowdown to Donald Duck: The Lucky Dime Caper for the Sega Master System. Add these tips to the lives cheat we've printed earlier and you should have no problem in defeating this topper game. Thanks to James McGuire from Manchester for this invaluable guide.

1

## STAGE ONE

This is a simple level. Just keep hitting every bee and mushroom for extra lives and bonuses. To defeat the bear, face him and stand your ground and keep whacking him. If you have four stars, you'll beat him with ease.

4

## STAGE FOUR

There's not much advice we can give you here, but try to get the friabee during the course of the level. To defeat the boss, follow these instructions. Stand in the middle of the screen. When the black duck appears, jump up and fire the friabees at him. He moves to the left. Turn, jump and fire. Repeat until he dies.

Donald lives it up at the South Pole.

5

## STAGE FIVE

To avoid the hideous death associated with the sandtraps, just keep jumping. Inside the pyramid there are several bonus rooms. Enter these to obtain extra lives! Collect the key in the room that is second to last at the left end of the pyramid. This key opens the door at the right end of the pyramid, where you fight the end-of-level boss. Defeating the boss is simple. Just keep jumping up and whacking the black duck until he falls.

A quiet moment for our hero!

6

## STAGE SIX

The South Pole Reaching the end is easy. Just choose any path. In the caves and the path should eventually lead to the end-of-level guardian. To beat this guy, just keep whacking him until he falls. It really is that simple, but keep your eyes peeled for the potentially fatal block of ice.

2

## STAGE TWO

Do your best to avoid the vultures, snakes and other hazards, but don't worry if you lose your weapon before you face the lion. To beat this foe stay in the middle of the screen and jump over him when he runs at you. Now, when he is to the left of you, jump on his head and he will rush back to his starting position. Repeat this process.

7

## STAGE SEVEN

This is the final level - Magica de Spell's castle! Watch out for mirrors, portraits and hats and remember that you can jump on anything! This is the path to getting loads of bonuses and collecting a large score. When you're on the green lift section, don't stay on the lift too long as you'll get impaled on some spikes! When you reach Magica de Spell's sanctum, keep jumping on the round object on the table in the centre of the room until your name is blue the dust! Easy, or what?

3

## STAGE THREE

Break the vases to get a nice stash of extra lives. On the section where you have to jump across the platforms with spikes below, try to get five stars. You should be able to rush across half of this treacherous stretch. For the rest, jump from platform to platform, avoiding the blue cubes. At the

end of the level, try to have a hammer or friabee (the hammer is quicker). With the hammer hit each statue twice and then whack the yellow shape that comes out of them. With the friabees, fire upwards at the statue about eight or nine times. Then fire at the yellow shape as usual. If you have neither weapon, you will find this section very difficult indeed!

Rescue Donald's nephews in these locations!

**TIPS**

This month we've collected the best tips for this Acclaim shoot 'em up stormer. Perhaps the best of the bunch was from Alan Wong, who provided the clearest maps. These maps, along with his amazing tips, are reproduced here for your benefit.

**THE PLEASURE DOME**

To get into the Smash TV Pleasure Dome, you need to collect ten keys as they throughout the whole game you get to the room tagged w the question mark. you should collect the final key and warp instantly to the Smash TV Pleasure Dome! Hurreh!

**SECRET ROOM SHENANIGANS**

To enter the secret rooms, follow the route indicated on the maps and instead of leaving via the top exit, walk right through the door. You should enter the secret room where bonuses are plenty! But more importantly, you get the ? icon. Collect these in all three secret rooms, the Pleasure Dome and the final boss for a total of five ? icons. There will be a new special ending for the game and you are treated to a special "turbo" level! You have seven lives and seven credits to clear this special stage!

PLEASURE  
DOME

From July, the much talked about Game Genie range will be officially released in the UK. These cheeky accessories allow players to enter codes into the programming of their carts with the express intention of cheating in some way, such as granting infinite energy or loads of fab power-ups. Radion Automatic reviews the Nintendo version of what could be the ultimate cheating tool

## HOW DOES IT WORK?

console port, allowing the game to run through it. Once the machine is switched on an option screen appears showing a menu of letters and a varying number of code slots (depending upon which machine it is running, for example the Megadrive can run five codes, topping the NES's three). Simply move the cursor around the screen with the joystick to enter the required series of letters for the cheat you want and you're away. Included with the Game Genie is a code book with codes for most of the games officially released for each machine, and a helpline has been set up for Game Genie users to get up-to-date codes on the latest games.

▶ A blank Game Genie screen awaits instructions.

▼ Once all your codes are entered, press START to play your "enhanced" game.

## THE GAME GENIE IN OPERATION!

To give you a better idea of how the Game Genie works, here's a step-by-step guide to using the machine.

▼ Using the cursor, enter your desired code.

Unlock the power of your favorite video

GAME GENIE

VIDEO GAME ENHANCER

GAME GENIE

## GAME GENIE ON OTHER CONSOLES

The NES Game Genie release will be followed by a Megadrive version in November and a Gameboy version around next February. Super NES and Game Gear Game Genies are also in the pipeline. Super NES owners have to wait until next summer for their machine, whilst the Game Gear owners might not see the light of day until autumn of 1993.

## RETAIL INFO A-GO-GO

The Game Genie will be available in most High Street stockists, such as Dixons and Toys 'R' Us, retailing at £39.90 for the NES version and £44.99 for the Megadrive. Prices and final release dates for the other Game Genies are still to be announced, but expect them to be in the same price bracket as the current releases.

Unlock the power of your video games!

# GAME GENIE

gallop

VIDEO GAME  
ENHANCER

## WHAT DOES IT DO?

The effects of the Game Genie are many and varied. Most of the codes are based on the standard Infinite lives/time/energy theme, although there are a few codes which produce some interesting special affects, such as super bounce on the cars in Micro Machines or stopping the vitamin capsules falling in Dr Meno. One of the more useful effects of the Game Genie is that many codes allow you to start play on higher levels, so if there's a location you can't reach, you don't have to ruin the whole game by being invincible to get there.

## HELPLINE INFORMATION

The codes are being updated regularly, but instead of publishing them in a magazine, Homby (UK distributors of the Game Genie) and Codemasters have set up a helpline service. The line is open from 12pm to 7pm on weekdays, and from 8am to 12pm on Saturdays. This means if you buy a brand-new game and can't get anywhere after a couple of weeks you should be able to get some help, although you are advised to play the game properly before heading for the Game Genie. The helpline number is 0834 231088, and it is also open to enquiries about Codemasters console releases.

## THE VERDICT

There's no denying that the Game Genie does its job admirably! There are tons of codes for just about any situation and the helpline should keep things bang up-to-date. However, over-use of the Game Genie could completely ruin your enjoyment of a game. Imagine forking out forty quid for a cart, bunging in a couple of codes and clicking it within an hour. The Game Genie is best used for the special affects codes, for making games a little harder or changing simultaneous two-player modes to make the proceedings a little more interesting. If you really are stuck, the Game Genie is certainly a boon, letting you access further levels or cheat if you so desire. If you think you can resist the temptation to go through all your games in ten minutes, the Game Genie is tops for fun and frolics, however, those with less will-power should steer clear or destroy much of their gamesplaying euphoria.

For centuries people believed that the Devil liked nothing more than listening to the tortured screams of sinners in eternal pain. As it turns out, he would rather destroy souls via pinball. No machine from *Sonic* to *Brighton* can compare with pinball in hell!

In *Dragon's Fury* (previously known as *Devil Crash*), players pit their skills against Beelzebub and his demonically possessed pinball table! This Megadrive sim is no ordinary pinball game, so challengers should expect a few breaks from convention. To begin with, the table is vast and no end of nasties stalk its surface. There are three sets of flippers, but only falling through the bottom set loses the ball.

While scoring points is the ultimate objective, the game has some diverging ways in which to do this. Should your sphere disappear inside certain holes, the game opens up to a bonus stage where the task is something wholesome like desecrating a coffin protected by bats, or demolishing a live-headed serpent.

The action moves fast and total concentration is essential if a player is to take advantage of all the points up for grabs. Even the pinball wizards out there might need an extra helping of intuition if they want to get one up on old Nick!

## TABLE MANNERS

The basic pinball table contains hundreds of features. Cloaked monks, exploding larvae, flying mutants, and what look like American Football players all bundle about willing to get run over by your ball bearing. The figure head in the centre of the table gradually changes into a mutant lizard if the ball hits the right spot, and special bonuses, like an extra ball, turn up from time to time.

▲ There are bonuses aplenty on the Star Board!

▲ These larvae are there to be destroyed. Go get 'em!

# Dragon's Fury

BONUS STAGE 1

There are six bonus stages of increasing difficulty. Stage one involves killing a live-headed serpent by getting the ball to bounce off its heads. Five hits are required to dispose of each head.

Bonus stage three involves two tasks. The first objective involves destroying the two wizards. After this is done, another nasty turns up. Once he's dead the bonus points are won.

# MEGADRIVE REVIEW

In stage two the idea is to destroy the three coffins protected by bats. Once again, around five hits on each coffin should be enough to destroy them. A million points are gained for pulling this off.

Stage four is an easier bonus level. All that a player needs to do is cause the skulls to explode. This jolly task is accomplished with around five hits to each skull.

## HEAVENLY ADVICE

Once the spring is released, keeping the ball above the top set of flippers is the best way to build a high score. As the ball falls further down the table, not only does the risk increase of losing it, but it also means that getting back to the big-time points is a lot more difficult.

Luck as well as skill plays a part here! In stage five the idea is to hit the throne in the centre of the garden, while cloaked guards do their best to deflect the blows.

Stage six is really tough. A weird beast spews up an even weirder snake-type thing which the player must destroy. Once this is done, the beast spits out a whole host of weirder still snake-type things which must be defeated. Weird eh?

## COMMENT

Featuring a superb, surprise-packed playfield, heaps of bonus screens and the most realistic pinball 'feel' I've experienced in a videogame, Dragon's Fury (or Devil Crash as it's called in Japan) is the finest afterball simulation yet seen! There's loads to discover and I came back to it time and time again to see whether I could find new ways of boosting my score - it's incredibly addictive in that respect! The graphics and sound are both outstanding, but really it's the gameplay that makes this very original and highly unusual game well worth checking out.

**JULIAN**

# COMMENT

There were a few things worrying me when I set about playing this macabre pinball sim. Firstly I was worried that the inertia of the ball would be unrealistic, and secondly I feared

## ROB

the table would only contain static obstacles. I'm happy to say that all of my fears were quickly dissipated. The inertia effect captures the weighted effect of the ball perfectly, and the flurry of activity kept my eyes glued firmly to the screen. The graphics are state of the art, with all of the sprites expertly drawn, and some mesmerising effects on the bonus stages. All of these elements go to make the gameplay very entertaining and realistic. The only thing I didn't like about this game was the music. There is nothing wrong with it as such, the sound quality is superb in fact, it's just that my tastes veer away from the dramatic rock opera guitar solos, and the whines of a satanic wind organ. But despite this tussy criticism, it's true to say that Dragon's Fury sure makes a mean pinball!

Unhhh! There are many evil monstrosities in the Dragon's Fury game. This one is very dangerous.

Here's another of the bonus screens secreted within the Dragon's Fury game. Here, you are charged with the task of destroying spinning coffins.

BY: TECHNOSOFT

PRICE: £34.99

RELEASE DATE: JULY

GAME DIFFICULTY: MEDIUM

LIVES: 3

CONTINUES: NONE

SKILL LEVELS: 1

RESPONSIVENESS: GOOD

1-2  
PLAYERS

## PRESENTATION 90%

There are eerie little screens, a password system and an all-important two-player option.

## GRAPHICS 94%

There are some stunning 3D effects especially on bonus stages. The sprite animation and backdrops are both superb.

## SOUND 91%

Excellent sound effects and a well put together musical score enhance the game atmosphere perfectly.

## PLAYABILITY 91%

Because the ball moves very realistically, this is just like pinball, but with all of those impossible extras!

## LASTABILITY 88%

Mastering the tougher bonus levels should keep you going for some time. Working on a high score also takes practice.

## OVERALL 92%

A remarkable "gothic" pinball sim that succeeds in every aspect. A must for all Megadrive owners!

# TOP GEAR

Super NES speed freaks who've conquered the likes of F-Zero and F1 Exhaust Heat will doubtless be soiling their underwear in excitement when they play in Top Gear.

Top Gear offers the usual blend of top-speed thrills n' spills as you race through seven different countries, each with their own range of dangerous tracks to master. But whereas previous Super NES games have restricted this fun to just one player, Top Gear enables two players to battle it out in an all-or-nothing bid for glory!

Do you reckon you have the driving mettle of a Mansell? Or is the sluggish speed of a shambling Skoda the best you can achieve? Check out Top Gear and see for yourself!

▲ The races move on to Paris (note the Eiffel Tower in the background)! The red car takes on the white in an all-or-nothing race for Top Gear supremacy. White has the slight advantage of starting a position ahead.

▲ It's a close one here in the Shere Desert, as the red car uses his speed advantage to pull ahead.

## I LIKE DRIVING IN MY CAR

Should you glance at the player select screen, you'll find an option to change the fine automobile that you take into the Top Gear championships. Four vehicles are available, each with their own strengths and weaknesses.

### RED

The red car has the highest top speed out of all four cars, but its acceleration isn't too hot and the tyre grip leaves a lot to be desired. Add in the high fuel consumption and you have a car that is best left to Top Gear experts.

**TOP SPEED:** 147 mph  
**0-60:** 5.9 seconds  
**TYRE GRIP:** Low  
**FUEL CONSUMPTION:** High

### BLUE

The blue car is a little better than the sad magenta effort. It's got the same top speed with improved handling and pokier acceleration. A fine automobile for Top Gear players who've just found their feet in the game.

**TOP SPEED:** 137 mph  
**0-60:** 4.3 seconds  
**TYRE GRIP:** Medium  
**FUEL CONSUMPTION:** Medium

### MAGENTA

This car isn't so great, being about as useful as a three-wheeled roller skate. Although its top speed is pretty good, its handling is pretty awful, the acceleration plodding and its fuel consumption unamiable.

**TOP SPEED:** 137 mph  
**0-60:** 5 seconds  
**TYRE GRIP:** Low  
**FUEL CONSUMPTION:** Medium

▲ Check out the world rankings in Top Gear! Reckon you're good enough to reach the top?

## SPLIT-SCREEN SKYLARKING

Top Gear is a split-screen road racer (as you most probably figured out for yourselves by looking at the many pictures on the page). In one-player mode the computer occupies the lower screen providing a stiff challenge to the player. In two-player mode, the second participant uses the lower-half of the screen. The screenshots cannot convey the sheer speed of the game, or the incredible fun of the two-player mode!

▲ A wide road here should cause no problems for Top Gear players. Burn rubber!

## LIGHTS IN THE NIGHT

Some of the Top Gear tracks are played in the night! This means that visibility during the race is poor, so be extra careful during these rounds. Luckily, your cars have headlights that automatically activate on these rounds - the only problem is that they're really not very good!

## COMMENT

**RICH**

The programmers sent this topper road racer to us earlier this year and it had me and Jaz hooked for ages. Okay, from the screenshots you might think that Top Gear is a bit average, but you haven't seen the speed of the game or sampled the amazing gameplay! Top Gear is simply the most amazingly playable road racer yet devised. I cannot aptly describe the sheer feeling of speed that Top Gear manages to convey, especially when you make use of one of your three nitros. Add in the two-player mode and you have what can only be described as one of the most competitive games yet devised. There are no grumbles about the lack of variety either. There are many tracks to conquer and four cars to attempt this task with. I thought that F-Zero and F1 Exhaust Heat were the best examples of the racing genre, but I was wrong. Everything you really need from a road racer is in Top Gear!

**BY: KEMCO**

**PRICE: £39.99**

RELEASE DATE: OUT NOW

GAME DIFFICULTY: MEDIUM

LIVES: N/A

# OLYMPIC GOLD

The Olympics. Ahhh! It conjures up some priceless memories - David Coleman getting so excited he's in danger of suffering a cardiac arrest, setting the alarm for three o'clock in the morning in order to watch events taking place on the other side of the world, the opening and closing ceremonies and Olympic endorsements on everything from running spikes to tea bags.

US Gold have snapped up the much sought after gaming endorsement and aim to capture the spirit of the games with Olympic Gold. There are seven events to compete in which sum up the whole athletics experience. Sprinting opens the games, and like the hurdles and swimming it's tailor made for neurotics! To test skill as well as nerve there is the pole vault, the hammer, diving and swimming.

Developing a perfect technique reaps obvious rewards. As well as the obligatory gold medal, there is a point system done in much the same fashion as the decathlon. Good form in all events is therefore important. There is also the chance to compete at club, national or even Olympic level, when there is a need for stronger opponents. But the challenge doesn't stop there. As well as gold medals to win, there are Olympic and world records to break. It's enough to send Dave into intensive care!

## COMMENT

### ROB

Although I was expecting a very similar game to the Megadrive version, I was nevertheless surprised at just how much the same this is. About the only difference is that in the sprint, the hurdles and swimming, three compete rather than six. It's much to the Master System's credit that it has managed to retain all of the options as well, including the very handy teach facility. The graphics are impressive as well, with good animation in all of the events. Because of the similarity though, Master System Olympic Gold also inherits the Megadrive's problems. Some of the moves are fidgety because of the awkward control sequences, and this makes the game frustrating at times. Another thing I was disappointed with was the lack of originality, many of the events have been seen before in the likes of Summer Games. Despite my grumbles though I enjoyed playing Olympic Gold. It has quite an addictive quality, especially in events like diving, archery and the hammer, and the desire to break world records kept me plugging away for some time. It's true that Olympic Gold has been released on a wave of Olympic hype, but for sports fans and fanatics it's a wave worth riding.

## TEACHER'S PET

Because some of the moves are very tricky, the programmers have included a teach facility which takes the player through the moves step by step. In events like the pole vault and diving, perfect technique is the secret to success, but it is also something that takes time to master.

▲ Here it is! If you're good enough to come first in any given event, you're awarded with this amazing gold medal!

SEGA

# REVIEW

## HOW SOON IS NOW?

In the sprint, the hurdles and swimming, the good old button bashing technique is used. In these events time is very important. World or Olympic records rest on a hundredth of a second. This means that a flying start and (where the sprint and hurdles are concerned) the all important dip on the line are crucial if you want to be a record breaker.

## MY FAVOURITE PANTS

Diving gives the competitors a chance to elip on their favorite pants and take to the spring board. The competitor chooses a dive and is judged on the quality of its execution. Here is where the teach facility comes in handy because there are a wide variety of different dives to master. Pulling off the hardest dives secures the greatest rewards, so go for the inviarid double pike twists... whatever that is!

## JUMPING JACK FLASH

The most annoying thing about the hurdles is all those fences that get in the way of your runner! The only alternative is to hurdle them. In this event, judging where to jump is of vital importance. If a compellor launches into the hurdles too early he goes tumbling, and if he jumps too late he likewise goes bum over breast.

## VAULTING CAVALIER

The pole vault, like diving, involves a complicated sequence of moves which take time to perfect. A fast run up and good judgement of where to plant the pole, as well as accurate release and directional control are all essential for successful vaults. It seems tough at first but it gets a lot easier

## COMMENT

**JULIAN** Although this suffers similar problems to its Megadrive big brother - no simultaneous two-player action and a lack of truly exciting avants - I actually prefer this to the 16-bit version that we reviewed last month! The graphics are just as good and the game seems to be slightly more playable. That's not to say that it's the greatest sports game in the world - after all, the Megadrive game was no great shakes - but at least this is more fun and challenging. Olympic Gold certainly won't set the gaming world alight, but it's nevertheless a fun and enjoyable sports simulation which fans of the genre should feel satisfied with.

RELEASE DATE: JULY  
GAME DIFFICULTY: MEDIUM  
LIVES: N/A  
CONTINUES: N/A  
SKILL LEVELS: 3  
RESPONSIVENESS: OKAY

## PRESENTATION 90%

There are options aplenty with the chance to compete in mini or full Olympics or get some teacher training

## GRAPHICS 87%

Backdrops are a bit lifeless, but the sprite animation in all the events is quite impressive

## SOUND 40%

Sounds like someone's kicking a load of tin cans around inside the Master System

## PLAYABILITY 85%

Some of the controls are a bit fiddly but generally they're smooth and responsive

## LASTABILITY 79%

The three skill levels and the desire to break records, as well as accumulative gold medals should keep you button bashing

## OVERALL 81%

While it's not particularly original, Olympic Gold manages to entertain and offers some addictive gameplay. Quite remarkable!

# ARCH RIVALS

Arch Rivals, the latest in a growing line of Megadrive basketball games, casts aside the serious aim aspect of previous titles and proffers a more cartoon-like, humorous approach to the sport.

Only two players from each team are on the court at any time and the player controls only one of this pair. As any non-baboon knows, the object of this game is to score more points than the other team by

simply posting the ball through their hoop. However, such is the desperation to win that the teams stoop to whatever unsportsmanlike measures it takes. Thus, on-court violence is an integral part of Arch Rivals. What's more, there's a two-player option so you can bait your friends any time you like (although it's advisable to only do this in the game!)

## COMMENT

The idea behind this humorous, knockabout arcade-style basketball game is a good one, but like its arcade counterpart, it simply doesn't provide enough fun to keep you

## JULIAN

playing. Controlling only one player is frustrating, especially since the other player lacks intelligence and never does what you want, and the ropey collision detection just makes things worse. And that's not all! The controls themselves sound good, but in practice they're fiddly and scoring baskets is very simple once you get the game assessed, which takes very little time at all. In two-player mode there's a tiny spark of fun, especially if you manage to pull your opponent's trousers down (very strange and perverse indeed), but really it's all too shallow and superficial to sustain interest for more than a couple of afternoons.

## STARTING AT THE BOTTOM

The rugby tackle is useful for any number of things. Firstly, it is used to bring opponents down, causing them to release the ball. Secondly, it is used to block passes and catch rebounds. Lastly, if successfully performed, it sees you pulling down the shorts of an opposing player!

## MANIPULATE YOUR BALL

Although passing and shooting are still important facets of the game, the moves available to your team stretch beyond such mundane pursuits. By combining button presses those crazy basketball types can feint, pass, fake shots, block and leap. On a slightly less polite front, they can also rugby tackle each other, and steal the ball by smiting the possessor a mighty facial blow!

MEGADRIVE

REVIEW

COMMENT

**RAD**

Given that there is no shortage of horizontally scrolling basketball games for the Megadrive, Arch Rivals at least scores points for trying to do something a bit different.

Unfortunately, this is just about the only thing Arch Rivals has going for it. For starters, the whole idea of two-on-two basketball is a little pointless, leaving no scope for real strategy or team play, a point which is reinforced by the lack of any real rules - it's just run 'n' shoot all the way. Only being able to control one player is another let down. Hell the time your player isn't even on the screen! This makes things frustrating to say the least. The collision detection and perspectives are also poorly done, making steals and punches difficult from any sort of angle. Then there is the tiny number of teams, it must have

**MENAGE A QUATRE**

There are four teams to choose in Arch Rivals. Each consists of four players, and only two can play in each game. From the menu you choose the player you would like to control; the Megadrive then automatically chooses a partner for you. Each team has their own playing style, so matches between Los Angeles and San Francisco are quiet affairs, whilst playoffs featuring Natural High and Brawl State are veritable slugfests!

been possible to put in more than four, and the lack of any sort of league. This leaves Arch Rivals bereft of any lasting appeal. What's the point in playing an endless string of friendlies? Even in two-player mode Arch Rivals is no better, scoring baskets is more a matter of luck than judgment, and the wild over-responsiveness extends this sad state of affairs to just about every other action too! It's a lark-related sporting horseplay you're after, head for Supreme Court Basketball instead.

**BY: IMAGEWORKS**

**PRICE: £34.99**

RELEASE DATE: TBA

GAME DIFFICULTY: EASY

LIVES: N/A

CONTINUUES: N/A

SKILL LEVELS: 1

RESPONSIVENESS: ERRATIC

**PRESENTATION 72%**

There are a number of options, but they're not very user-friendly and pointless.

**GRAPHICS 61%**

Well-animated but under-detailed sprites and a single, limp backdrop.

**SOUND 49%**

A repetitive tune bleats throughout, ruptured only by a few dismal effects and fuzzy speech.

**PLAYABILITY 43%**

Over-responsive and far too simplistic, there's no thought or skill required to win.

**LASTABILITY 27%**

No league or playoffs mean single games quickly become boring. Two player mode is unlikely to ease it.

**OVERALL 40%**

A dull and frustrating release whose "comedy" facade doesn't dredge it from the bowels of tedium.

# NINTENDO REVIEW

## Micro Machines

A BIT OF  
RUFFTRUX

Every time you come first three races in a row, you are given the opportunity to expand your stock of lives. You are placed in control of a Bigfoot clone called a Rufftrux. The object of this bonus level is to reach the end of a dirt track course before your time runs out. Should you succeed, you're given an extra life. However, the combination of sparse road markings, barely negotiable rivers and boulders strewn across the road make this a lot more difficult than it sounds.

SKID  
MARKS

Taking a Micro Machine for a spin isn't as painless as it seems in the boat-bound stages! As in real life, the vehicle you are driving builds up momentum as it speeds onwards. This inertia makes controlling more than a matter of pressing the joypad. Your speed must be taken into account and braking measures taken to ensure a smooth turn. Failure to do this often results in your transport hurtling off course, usually to a nasty demise after plummeting groundwards from the table.

▲ Skiddy bends ahoy!

▲ Scoot across schoolbooks in Micro Machines.

## COMMENT

## ROB

When I first had a bash on Micro Machines I was mightily confused about the steering. Although the action is viewed from above, the players stare through the eyes of the driver.

Once I had figured that out and got the hang of it, I realised just how good a game this is. Perhaps its greatest asset is its playability. Although some of the courses are fast, the scrolling is always smooth and the vehicles always respond realistically. There are some excellent and inventive graphics as well. I particularly liked the race around the breakfast table, where the cars have to dodge marmalade spills and such like. At times the collision detection is a bit suspect, but this doesn't really detract from the game's entertaining style. Micro Machines isn't a game that is easy to master either. Even when you've managed to beat all of the opponents, there's still the two player option, allowing you to challenge a friend of equal (or not) expertise. NES owners are advised to pick this one up. It is the most original game on to appear on this console for some time.

MICRO  
MALARKY

The vehicles and courses in Micro Machines are a little bizarre to say the least. From racing sports cars across school desks covered in books, rulers and the like to GP cars burning across pool tables, raptate with balls, cues and rests. Each environment offers individual hazards to watch out for, such as water sprinklers in the garden which tend to knock your mini-helicopter out of the sky and rubber ducks in the bathtub boat races. There are also various substances, tailored to each course, designed to slow your vehicle or cause it to skid out of control. These include marmalade on the breakfast table, ink sticks on the desk level and bunches of suds in the bath.

# NINTENDO REVIEW

**CONTROL  
CAPERING**

The Micro Machines control method differs from most other racing games. Instead of your car having brakes, it is given a reverse gear. A light tap on the reverse button allows your car down a tad, whilst a prolonged press sends your vehicle shooting backwards at high speed, which is handy when you're trapped behind a large object. The reverse button also has a second use. Whilst driving tanks, providing the accelerator is also being pressed, the reverse control fires your cannon, capable of temporarily destroying your opponents, thus allowing you to take a comfortable lead.

## COMMENT

As a license, Micro Machines is almost as bizarre as the soon-to-be-released Monstrix in my Pocket. As a game, Micro Machines works brilliantly. Although the graphics are somewhat inconsistent, with some of the sprites and backgrounds being really basic and others

## RAD

having loads of detail, they don't really detract from your enjoyment of the game. The sound is okay, there aren't many effects, but the tunes are some of the best yet on the NES. What sets Micro Machines apart is the superb playability. The vehicles handle smoothly and realistically, sometimes with a frenzied turn of pace. The smooth scrolling moves things along perfectly, without hint of speed blur or jerkiness. The only fly in the ointment is the off-centre collision detection for the sticky, deceleration inducing hazards such as glue slicks or marnelede. Micro Machines is a very different race game that brims with playability. NES owners would be mad to miss this.

**TWIN-TYPE  
HORSEPLAY**

In two-player mode the races are set over four laps as usual, but the rules for victory are very different. One player controls a blue vehicle, the other is red. An eight-point score bar is present in the top-left corner. The object of the game is to fill the bar with dots of your colour by being the first to reach the front edge of the screen. This is trickier than it sounds, and when you're leading the race it's almost impossible to see the course ahead of you!

**BY: CODEMASTERS**

**PRICE: £34.99**

RELEASE DATE: JULY

GAME DIFFICULTY: HARD

LIVES: 3

CONTINUES: NONE

SKILL LEVELS: 1

RESPONSIVENESS: MICRO-GROOVY

## PRESENTATION 90%

More options than there are Micro Machines (well, not quite), and the game is beautifully presented throughout.

## GRAPHICS 74%

Inconsistent sprites and backgrounds that range from okay to brilliant. The scrolling is great.

## SOUND 82%

Brilliant tunes which, sadly, do not play throughout. The effects are pretty average.

## PLAYABILITY 95%

Fast and responsive, Micro Machines is most playable.

## LASTABILITY 91%

The tournament and two-player mode will keep you going for yonks. You'll still play this even once it's completed.

## OVERALL 93%

One of the best NES releases in months, and one no self-respecting games fan should miss.

# MEGADRIVE REVIEW

As far as adventures go, this is a pretty strange one: the only (very) vague signs of sanity lie in the plot. Talmi's four pixie girlfriends have been kidnapped, (surprise! surprise!) and they are being held by a particularly nasty wolf who, for some suspicious reason, enjoys wearing Viking outfits. Anyway, he's got them locked away somewhere in Marvel Land, a vast amusement park.

Marvel Land doesn't possess the characteristics we might expect of your average fairground. There are no dopey gals trying to impress the girls by making them throw up on the walzers, and the sap who terrorizes the bumper cars is also absent. Instead, Talmi must overcome a whole collection of bizarre obstacles. There are moles welding spears, pink mushrooms with spiky personalities, blubbering sharks, lunatic penguins, and a whole host of other undesirables who Talmi has to jump on to obliterate.

This Megadrive adventure is a vast game. Marvel Land has four worlds, and each world incorporates seven levels. There are frantic rides on roller coasters, desperate treks across waterfalls, mayhem aboard sleamboats, and castle-bound intrigue. Basically, it's all the fun of the fair!

# TALMI ADVENTURE

## COUNTDOWN CONUNDRUM

Rock blunts scissors, scissors cut paper, paper covers rock! Everyone knows that game, and Talmi has to play it to stand a chance of graduating from world one. At the end of stage two things get very strange. The task involves finding the correct pump to make the octopus burst! Talmi's task at the end of world three is a case of matching up symbols quicker than his cake-covered opponent. A friendly canine pops up at the end of level four. The idea is to chase a hole to appear from and bash him on the head before he does the same. If successful, Talmi enters bonus levels, where earning for the stars is rewarded with points aplenty.

▲ Talmi helps an Octopus explode

▲ Carrot on a hot tin roof.

# MEGADRIVE REVIEW

牛牛集

# T'S ADVENTURE

▲ A roller coaster ride to poker time!

Marvel Land is split into four worlds. World one contains most of the typical fairground attractions, like the ferris wheel, the swinging pirate ship and the roller coaster. Whilst they are awkward obstacles, they can be used to Taimt's advantage. There are hidden doors among the clouds which can only be reached by braving some of the rides.

## COMMENT

The first thing that grabs you about Taimt's Adventure is the quality of the graphics. The screen is awash with colourful sprites and backdrops, and the comical style of the characters

## ROB

brings Robocod to mind, especially on world three where the scenery is made up of various types of food. The whole platform experience is here, with a few original extras like Taimt's revolving attack method. But this game does have its short-falls. A straight forward fast-first attack requires absolute precision, which can lead to frustrating deaths. This problem is magnified when you consider that Taimt's Adventure involves some tricky gameplay. Another thing to watch out for is the slowdown that occurs at certain points, which can jeopardize your progress. But for me, the pros tend to outweigh the cons, because the size of the game and the range of entertaining features provide the incentive to keep coming back for another go. A good example of the genre.

▲ Taimt reaches for the stars.

▲ It's frog's legs for dinner.

## CREATED IN HIS OWN IMAGE

There are plenty of items for Taimt to collect that have a variety of uses. Most interesting is the spin attack. When Taimt collects this icon, he is followed around by

multiple clones of himself that spin at a touch of the right button eradicating any baddie unfortunate enough to be in its way. Wings and extra lives are also available.

## COMMENT

### RICH

Taimt's Adventure (also known as Mervel Land) is graphically a fine game with many eye-catching features to keep you entertained. It's also a very large game. Four worlds may not sound like a lot, but there are many sub-levels to each world and all of them are quite large. My main niggle with this game is that the action is just not really that exciting, especially compared with the likes of Sonic the Hedgehog, Spider-Man or Chuck Rock. The pin-point accuracy required to succeed in the game is also something that takes some getting used to, as Rob mentions in his comment. Megadrive gamers who enjoy platform games should get their money's worth from this one. Others should try to get a look at the game before buying.

▲ Taimt tackles the 39 Steps.

▲ Revenge of the killer cecate.

World two takes our hero out into the hills, where crossing waterfalls and streams is the order of the day. Look out for the sharp shooting fish and many cunning platform hazards designed to put Taimt on ice!

World three is truly scrumptious, with Taimt struggling to resist the temptation to eat everything he passes. The scenery is made up of cakes, buns, and ice creams.

Things cool down in World Four, where penguins armed with spikes stalk the ice, among many other platform-related hazards. But once you've got this far and you've exhausted the bonus levels, there is still the villainous Viking Wolf to do away with.

## MEGADRIVE REVIEW

牛奇集

BY: NAMCOT

PRICE: £39.99

RELEASE DATE: AUGUST

GAME DIFFICULTY: MEDIUM/HARD

LIVES: 3

CONTINUES: NONE

SKILL LEVELS: 3

RESPONSIVENESS: GOOD

## PRESENTATION 90%

Lots of enjoyable title screens and plenty of options, including an essential password system.

## GRAPHICS 87%

Sprites are well defined and there are plenty of cheerful colours knocking about. The animation is pretty good as well.

## SOUND 85%

Pleasant fairground tunes that catch the atmosphere of the game.

## PLAYABILITY 80%

Controls are responsive, but the precision needed in attacks can frustrate. The game also suffers from slowdown occasionally.

## LASTABILITY 84%

The amount of levels, and the difficulty of the gems means you'll keep beehing away for some time.

## OVERALL 83%

A platform game that includes all the regular features and a few new ones. Fans of the style should be satisfied.

## REVIEW

By the end of the 20th century, a few 50-year-old men got the idea of resurrecting old men with ancient vacuum cleaners. Look at Todd, a steel-eyed, clear-eyed sack of testosterone. However, Todd's job extends a little further than cleaning a few local offices for a couple of hours a night. Todd's a rascal, an interplanetary space cleaner with the unenviable task of cleaning up the putrid Slime World, a planet composed entirely of anti-eater mucus.

The thing is that Slime World is full of valuable minerals called slime gems which are of great use to earth society. However, it is also full of evil, slime-dwelling creatures with Todd's demise very much in mind. Todd must now clear the way for the mining colonists by ridding the planet of its odious hordes, as well as collecting as many slime gems as he can to increase his personal fortune.

The Slime World itself is a pseudo-platform network of tunnels composed of slime of a varying solidity. Todd runs, jumps, and climbs around in his search for the slime gems, taking out slime monsters with his high-power water cannon on the way.

## SLIMY SCENARIOS

Before starting the game, your desired scenario is selected from a menu of possibilities. These go from the sedate exploration option, where the object is simply to find your way to the exit, to the survival option where you are stranded in the Slime World without any weapons and have to live or die by your wits. These options vary slightly in two-player mode, with some options being cooperative and others encouraging back-stabbing aplenty.

# SLIME WORLD

Heroic as Todd is, he needs to take the perilous journey on his own. One of your friends can take control of Todd's trusted aide Kevin in the split-screen two-player mode. The two pals can use their water guns to clean each other by way of a quick hosing down and also shoot each other with slime guns should they stumble across one and feel particularly malevolent. Before the game starts it is up to you to decide whether to play cooperatively or competitively, with only the one true slime master surviving in the latter mode.

## HE SLIMED ME!

## REVIEW

An exciting shot of the slime-related antics

Note the map in the top-right corner.

## SLIMEY ITEMS

Do ted around the slime caverns are a number of objects which help Todd in his mission. These include power-ups, slime shields and items which provide limited protection from the covering smart bombs and jet backs. Certain levels have a time limit within which Todd must make his escape. The small red mushrooms found in these levels are essential. Each mushroom raises the limit by one minute, up to a maximum of five, leaving Todd with plenty of time to take a leisurely stroll through the underground.

A close-up of Todd as he picks up some of the objects located in the slime caverns.

Todd jumps over a slime pool. Watch out for these as they dirty up our hero incredibly quickly.

Uh-oh! More problems for Todd as he progresses into the level.

We're shown the end of the game, which is a bit of an over the top.

## MAP-TASIC, MATE!

Todd and Kevin automatically start the game with their electronic maps. These miracle of modern technology auto-map the area which has already been traversed, making it simple to find your bearings if you should accidentally backtrack. The maps also record the positions of slime pools and water pools for ease of reference.

## DEATH BY SLIME

There is only one way to die on Slime World - death by snaf. As Todd comes into contact with slime beasts, mud pools and the like, he is slowly coated in gooey slime. Should Todd become excessively slimy he explodes! Luckily there are pools of fresh water dotted around at irregular intervals. If Todd is guided into one of these he promptly begins to wash himself, like the soul of cleanliness he is, thus preventing him from meeting a sticky (not to mention slimy) end.

## MEGADRIVE

## REVIEW

- ▶ The Slime World in all its glory! It's a pretty large place, as you can see.
- ▶ Todd enters a cavern and proceeds to shoot a whole bunch of slime meemies. Their slime shoots everywhere.

## COMMENT

## RAD

Slime World is entertaining in its concept, although the thought of a platform adventure where your character mows in and out of the grass. The gameplay is really enjoyable two-player mode, especially in a competitive scenario! However, it's not all fun and frolics for Slime World. The graphics are airbrushed, the sprites are malnourished and the backgrounds don't really change. The scrolling is jerky and blur-inducing, and the back-handed controls and slow responsiveness rob the game of a lot of its potential. Slime World is a fairly original and challenging title which is okay if you don't mind the crippled pace.

## COMMENT

## RICH

Slime World is a pretty jolly game and should appeal to people who enjoy a good exploration game. There's plenty of mappable levels to explore throughout the game and a variety of secret rooms to unearth beneath all the slimy Slime World's many different game variations and the great two-player mode also add to the fun. My gripe with the game is similar to Red's. The game is graphically backward and jerky scrolling should not be permitted on any Megadrive game. I guess it's just down to poor programming. Exploration fans with a hum ready for some two-player frivolity will probably get their money's worth. Everybody else should spend their hard-earned shekels elsewhere.

Facing up to some of the more dangerous territories in Slime World.

# NINTENDO REVIEW

GODZILLA

MOVE RATE 2 HEXES

**ATTACKS** Godzilla can punch and kick using the A and B buttons, as well as perform jumping attacks (UP on the joystick) and a deadly spinning tail lash, although he must be in a crouch to do this.

**SPECIAL ATTACK** Pressing SELECT unleashes Godzilla's radiation fire blast. Although this is highly powerful it tends to drain his power bar very quickly and this takes a long time to replenish. Best saved for boss monsters.

GIGAN

Gigan is the most powerful of the monsters. He can spin his tail and saw. His eyes are like a saw and Moltra's energy, so...

m

MAP

At the start of each level, a 3D map displaying all the sectors of the planet, the terrain of each hex plus the location of the enemy base is shown. Godzilla, Moltra and the enemy monsters are also displayed. Each side takes it in turn to move their monsters, with each one having a different move rate. The friendly monsters then traverse their routes in turn, fighting evil along the way. Should they encounter a monster from the wrong side of the tracks, play switches to a one-on-one combat screen where the two battle it out.

MONSTER OF

# GODZILLA

# NINTENDO REVIEW

任天堂  
ゲームボーイ

MECHA-GODZILLA

Mecha-Godzilla is almost equal to the real thing in terms of power. The Space Beam it projects from its eyes is very dangerous and its punches are the most powerful of all the monsters. Try lots of special attacks.

MOGURA

A rather sad robot monster who repeats the same attacks over and over again, although his eye beam is quite nasty. Trap him in a corner and he's as good as dead.

Standing as tall as Godzilla, Varan is a very dangerous opponent in a grapple. However, he has no ranged attacks, so eye beams or fire breathing should see him off.

## F MONSTERS

# GODZILLA

## COMMENT

### RAD

Look at the box art of Godzilla and it seems very impressive - there are lots of huge, colourful sprites in glorious detail in the screenshots and the promise of much re-breathing material. However, these expectations are out awfully short within minutes of play. The strategy element seems great but ultimately it doesn't make any difference to the game. The main problem is that your monsters are too big. It's impossible to dodge most of the shots on the scrolling levels, and survival is merely a matter of finding enough life-ups to sustain you. Combat with the enemy monsters has little skill involved, once again because there is so little room to manoeuvre. Playing as Mother is even worse since every time you are hit you are repelled to the bottom corner of the screen, making it all too easy to become inescapably trapped by a gun emplacement which keeps on hitting you until you die. The graphics don't even live up to the promise of the static screen shots - there's a real slowdown problem whenever the screen gets halfway full and a lot of sprites flicker too. Give it a miss.

NINTENDO

# REVIEW

Top monster Chidora is as fast as they come. His randomly-fired gravity rays and unpredictable bite attacks from his three-headed spell death for amateur monsters. Much sucking, diving and fire-breathing.

CHIDORA

MOTHR

MOVE RATE: 4 HEXES

**ATTACKS:** Pressing either A or B fires Mothra's amazing moth-like eye lasers. These beams are less than powerful but they have a decent range which makes it quite easy to gain an advantage over bosses and non-weapons firing enemies.

**SPECIAL ATTACKS:** Mothra can launch a poisonous powder attack by shedding his scales. Although this doesn't cause much of a strain on his power bar it's pretty feeble and the range is only the area directly below Mothra's winged form.

## COMMENT

JULIAN

like all the crappy cheesiness of the Godzilla films - they're a great laugh, which is more than can be said about this sad effort. The potential of a veritable onetabrawl fest has been sadly lost in a sea of slow, flickery graphics and awkward gameplay. The Godzilla sprite is just too large to do anything except take damage from the myriad of gun emplacements and stuff, and instead of humungous combat you end up struggling to get to the next energy icon. The one-on-one combat sequences are more fun, but at the end of the day this simply hasn't got what it takes to make it an enjoyable and worthwhile game.

HEDORAH

This shambling slime beast is surprisingly quick with fairly powerful missile attacks. His expandable hands are the worst though, so don't get in too close.

TOHO CO., LTD. PRESENTS

## REVIEW

► The hero ponders his next move during level one.

There are many perilous leaps in store during this game!

▼ Many pressure pads are in evidence. This one opens the door in this room.

## PRINCE OF P

The Sultan of Persia has left the country, seeking to bring his own kind of scimitar-related justice to the heathen that dare inhabit the same world as him. He's left his trusted aide, Jaffar in charge of the country while he's out slaying people. Unfortunately, Jaffar isn't the trustworthy politician and trusted companion that the Sultan thought he was. Indeed, he is in fact a megalomaniacal madman out to seize Persia's reigns of power. In order to carry out this out "legally" he plans to marry the Sultan's daughter and then take over using the privileges of her birthright!

As the husky voice-over at the beginning of Knight Rider used to say, "One man can make a difference!" and that particular individual turns out to be a lowly peasant worker who catches wind of Jaffar's fiendish plot and decides to take him on single-handedly!

This is all an excuse for ten levels' worth of platform-related mayhem, as you control the hero as he progresses through the palace slapping Jaffar's henchmen about and working his way towards the final confrontation with the twisted madman himself!

However, luck isn't on your side. You start the game captured by Jaffar's minions and thrown into the deepest, darkest dungeon in the land. Can you escape, find a sword and then rescue the Princess from Jaffar's perverted clutches? Can you elop Jaffar becoming the Prince of Persia?

The most striking part of Prince of Persia is the outstanding animation of your character and the range of actions he performs. For example, he has two types of jump: a simple leap and a running jump. The latter enables him to spring across larger distances. Holding the button down during a jump readies our hero to grab hold of any ledges he might pass by on his descent. Other moves, like sneaking through spike fields and jumping up to grab onto other platforms are also available.

## REALISM

▲ Surely he won't make that leap!

Clambering up to a new platform.

SEGA

REVIEW

◀ Level three (pictured) is the first real challenge in the game. Are you up to it?

▼ Larger falls deplete your energy.

## IT'S A SECRET

Not a lot of people know this but there are many secret rooms hidden away in Prince of Persia. Parts of Jaffar's palace have a false ceiling that gives way if you poke it a bit. Just jump up and touch the ceiling to reveal the false tiles. Once you have gained access to the secret rooms, look out for life-prolonging potions.

## PERSIA

## COMMENT

JULIAN

Although it looks like just another platform game, Prince of Persia takes a fresh angle on this popular formula. Instead of the usual

de-style running and jumping, the gameplay is fairly static and, for want of a better word, far more realistic than anything I've played before. You have to think about where you're going to land, whether to haul

yourself up a level or cautiously drop down a floor. The realism is further enhanced by the outstanding animation. The movement of the main character is truly brilliant and is easily the most realistic I've seen in a console game - this is a game you really have to see to appreciate. The only thing I was slightly disappointed with was the combat - it's a bit weak and this parrying and thrusting could have been made far more realistic. But really that's a minor niggle, and it doesn't stop this being an essential purchase for platform/roadie adventure fans.

## SWORDPLAY SHENANIGANS

Once the player has located his trusty sword, he can pull it out at will and indulge in some swordplay with Jaffar's twisted minions. Unfortunately, only two moves are available. A good thrust is just the business for cutting up any opponent, while the parry option checks any attack from your adversary. Mastering the use of your sword is essential to progress through the game.

▲ A fight to the death with one of Jaffar's henchmen in Prince of Persia. Only two moves, thrust and parry are available for use.

# REVIEW

## CONSOLE CONNECTIONS

If you like the look of what you see here, you might be interested to know that Prince of Persia has been converted to other consoles. A Gameboy version is currently available that looks and plays just like the original version! Currently in production is a Super NES version. This looks like packing in even better graphics along with more superior gameplay. Keep your eyes adhered to our news pages for more information.

Dotted around Jaffar's palace are various potions just waiting for our weary hero to consume. But watch out, because some potions are poisonous! However, keep a look out for the good potions. Some of these just increase the energy level of our hero. Others actually increase the size of his energy bar, enabling him to take more damage! Hurray!

## COMMENT

### RICH

I used to be a real Prince of Persia fan. I had the PC version and many hours were spent playing it (when I should have been writing the mag!). This Master System version is truly excellent. It manages to combine all of the superb graphics and the stylish gameplay of the original computer versions, making for a game that's very enjoyable to play and extremely tough to beat. It's a bit difficult to play at first. The controls seem unresponsive and tricky, but once you've sussed out how to use them properly, you'll be stunned by the sheer amount of things you can do in the game. My one meanie is that sword-fighting is not quite as responsive as the computer version. This makes parrying your opponent's thrusts very difficult. But apart from that niggle, I can report that Prince of Persia is an excellent conversion and it's the best thing I've played on the Master System this month. Go for it!

# TINY TOON

Introducing Buster Bunny, Plucky Duck, Dizzy Devil and Furball, a bunch so cute that any self-respecting individual couldn't help but throw up if exposed to their presence! Tiny as they are, they do have a big problem. Montana Max has kidnapped Babs Bunny and is holding her hostage in his mansion. Her fate now rests in the hands of Buster and his buddies.

This NES toons escapade bounds around six stages with plenty of levels to conquer on each one. The journey is fraught with the usual danger as Buster comes up against Dr Gene Spicer, the skateboarding psycho, Arnold the body building pitbul and a whole host of other nasties. Once defeated, each of these bosses leaves behind a cage key. Six keys are required in order to save Babs from Montana Max's murderous clutches!

Buster is not alone though. Before each stage begins Shirley the Loon pops up and gives Buster the option of faking a pal with him on his quest. When Buster comes across a "toon-a-round", his partner appears in his place. Only by using this special technique will the Tiny Toons be able to defeat their twisted nemesis and his many minions.

But for the fluffy bunny and his cute cohorts, there is a long way to go before the cuddly Babs is saved, and the whole furry lot of them can live happily ever after. Blurrghh!

## HAMMING IT UP

During his quest Buster or one of his pals is likely to stumble across a white door. Inside is Hamton the pig and although he's too portly to join in the assault on Monty's mansion, he is prepared to give you an extra life if you have collected enough carrots.

## DIZZY!

As you would expect of a Tasmanian devil, Dizzy is rather good at spinning. This special attack only lasts for a few seconds but while in full swing it makes Dizzy immune to any nasties and enables him to blast through walls. His demolition skills come in very handy on stage three where he can work his way through the forest.

Dizzy Devil himself ▶

◀ Taz Jr spins his chin.

## NINE LIVES ARE BETTER THAN ONE

Everyone who owns a cat knows how they love to dig their claws right into your lap as a sign of affection. Furball digs his into the walls instead which allows him to scale them. It also means that he can save himself on cliffs, where the other characters would perish. Boomtown, stage four, is where he is most in his element.

## REVIEW

◀ If Furball collects thirty of those tasty carrots an extra life is his.

## COMMENT

ROB

THANK

## HELLO DUCKY!

Being a bird, Plucky Duck uses his wings to stay in the air longer, keeping him out of trouble. He is also the best swimmer so it is worth picking him at the beginning of stage two, Motion Ocean.

NINTENDO

REVIEW

EXTRAS!

Like in the tradition of most platform games, there are plenty of things to bag on the journey. Besides carrots, it is worth finding balloons that contain a happy heart, a toon-a-round, or a timer. A happy heart protects you for one hit, a timer stops time, but not for long, and a toon-a-round changes the character into his chosen buddy on the quest.

## COMMENT

## RAD

When I thought I couldn't take another NES platform game, along came Tiny Toon Adventures. Whilst not suffering from a severe case of originality, Tiny Toons has enough going for it to make it enjoyable. The choice of characters for each level adds a little strategy to the proceedings and the cute graphics and good animation give the game a cartoony atmosphere. Tiny Toon Adventures is also blessed with good collision detection and responsive controls so it's very easy to get in to. What really makes Tiny Toons a worthy title is the high difficulty level. Although there aren't actually that many levels, later on they get pretty hard and even platform experts will be challenged. My one major problem with this is the restart points. Every time you die you are sent back to the beginning of the level, or sometimes even the stage before that! This tends to make things disheartening, especially if you've just been killed by the boss, and repeating early levels again and again is monotonous. If you're not yet sick of platform games give Tiny Toon Adventures a go, but only if you're sure of your platform skills.

# SUPER

The Space Megeforce is the last word in airborne and orbital defence craft. It boasts tough hyper-elloy molecular shielding to protect it from enemy fire and a sophisticated variable weapons system allowing it to adapt to any combat situation. It is the scourge of Earth's enemies throughout the known universe.

▲ Mega blast action in evidence here.

▲ The Megeforce confronts evil alien mechanoids.

However, an unknown galactic power has made a determined bid for conquest of Earth, destroying all but one of the Space Fleet's Megeforce craft. In this game, you are cast as the last remaining pilot, seeking to defend Earth by destroying the Invasion mothership. This perilous journey takes you into the depths of space, from where only the toughest pilots return alive.

Super Aleste is one of the few vertically scrolling shoot 'em ups on the SNES. Your craft traverses the screen in its entirety, allowing maximum potential to manoeuvre.

There are twelve stages to blast your way through. Certain stages offer a departure from the standard up the screen action, with the boss following your ship around from the beginning and requiring hits to many different areas before biting the dust. If all this sounds a bit much for you, there is also a short game configuration for gunners with no time to spare! You begin the game with three lives, and once all these are lost it's game over. However, there are unlimited continues for those who think the challenge is beyond them.

## MEGABEAM

The Megabeam is a very potent laser which bolts on to your single barrel cannon. However, it needs powering up for a few seconds before its full fury is unleashed. The megabeam is good against bosses, but not much good where rapid fire is needed.

## CLAYMORE BOMBS

The Claymore bomb upgrade launches large projectiles to the front of the ship. Once these bombs come into contact with an enemy they release deadly shrapnel to their rear, disposing of any other hapless means in their path.

## MISSILES

The homing missiles are one of the better armaments in your arsenal. Although the rockets aren't as powerful as a laser, they are indispensable in situations where there is little room to manoeuvre.

## CIRCULAR

The circular weapon surrounds the ship with indestructible spheres which rotate, acting as both weapon and partial shield. The higher the power level, the more spheres at your command. This pod is good defensively, but poor for attacking.

FIDD

# ALESTE

## ING WITH YOUR WEAPON

**SUPER NES**  
**REVIEW**

集  
生  
寺

### SUPER BOMB

These gem-like smart bombs drift down the screen awaiting collection. Once grabbed, they remain in your arsenal either until they are used or until you lose a life. Super Bombs are best saved up to use against the end-of-level guardians

### DIRECTIONAL FIRE

This is easily the worst weapon of the bunch. A blue bomb is fired in whichever direction your ship is moving. This means to aim to the fore, your ship must be travelling up the screen! Not surprisingly, this can lead to a few crashes

### DRONES

Drones move in the wake of your ship and let loose with their cannons. Although their fire is not particularly powerful the good coverage it provides makes up for this. Drones can also be locked in position should you so wish

### LASER

A very high power weapon which suffers from being a little slow and having a narrow spread. The special rebound configuration is devastating if used in the right places.

▲ The drone weapon can be very useful in tight situations like this, but the optimum formation should be locked on.

### MULTI

The multi is a high power variation of your standard cannon. The higher the level of multi-fire, the wider the spread pattern and the greater destructive capabilities of the projectiles it spews forth.

# SUPER NES REVIEW

▲ Blast aliens over weird landscapes in space.

## THE IMPORT ALIAS

The game we've reviewed here is Super Aleste, available now from your favourite importer. We got our copy from ACE Consoles (071 383 0480). However, the game is planned for an official release and has a different name, Space Megalorice. No release date has been settled upon as yet.

### RAD

A mixture of full-on blasting and simultaneously avoiding the manifold traps and barriers placed in your path keeps the action at a manic level, and the speed at which your ship moves leaves you with little time to think. Super Aleste is very tough too, there are five difficulty levels and even the easy level is quite a challenge. If it's apocalyptic games you're after, Super Aleste is for you.

### COMMENT

Super Aleste is one of the most exciting shoot 'em ups I've seen in a long time. The graphics are superb, from the excellent sprites and colourful, detailed backgrounds right through to the many special effects, such as the warping boss who stretches and distorts his merry way around the screen. The sound complements things perfectly, with some great tunes and booming effects. The mixture of full-on blasting and simultaneously avoiding the manifold traps and barriers placed in your path keeps the action at a manic level, and the speed at which your ship moves leaves you with little time to think. Super Aleste is very tough too, there are five difficulty levels and even the easy level is quite a challenge. If it's apocalyptic games you're after, Super Aleste is for you.

### COMMENT

### JULIAN

If you'd asked me this morning what my favourite up-the-screen blaster was on any system, I'd have answered Gunhed on the PC Engine. Now that's changed 'cos I've played Super Aleste - the latest, loudest, best looking, most manicest blastathon yet seen! It's mayhem from the word go, with hyper destructive weapons, loads of aliens and installations to shoot into their component molecules, lots of incredible special graphical effects and stereo sound that'll shake the chins shire horse off your mantelpiece! It's tough too! Easy'll keep you occupied for a day or so, but crank it up to the top setting and you're presented with one of the most rock hard challenges I've seen in a shoot 'em up! If you're a serious blastaholic, this is the ultimate fix!

## SECRET BOMB

Although there are plenty of power-ups revealed by shooting aliens, some of the best ones are actually concealed in the scenery. Destroying the right bits of the background and some of the scenery-type hazards which face you may yield either a power-up or, in especially beneficial cases, smart bombs!

BY: TOHO

PRICE: £39.99

REVIEW

# SEGA REVIEW

▲ Incoming nukes in *Missile Command*.

▲ More *Missile Command* action here.

▲ Those missileer just keep on coming.

MISSILE COMMAND

In days of yore, the Atari Corp begat unto the world three arcade games. And lo, their names were Centipede, Breakout and *Missile Command*. Many people flocked to the arcades to play these hallowed machines, until they were pushed into obscurity by superior technology, hydraulic cabinets and Virtual Reality.

Then, one day, Virgin Games decided to convert these three classic games unto the Master System, to spread their message of killing insects, blasting nukes and smashing bricks to new gamers everywhere. And so, the three game compilation cartridge *Arcade Classics* was born unto the Sega Master System.

There is little more we can say about the cartridge here. Check out each box for a detailed description of each of the games contained in the package.

## ARCADE CLASSICS

BREAKOUT

▲ Ooh, looky here! It's a big wall of bricks awaiting complete destruction by your bat.

*Breakout* is the second game in *Arcade Classics*. The gameplay is pretty simple - you are a bat and must use your epherod-deflecting skills to bounce an energy ball against a wall of bricks. Once all the bricks have been completely destroyed by this activity, you move on to the next, more challenging screen. The difficulty level is upgraded by stronger wall formations (which lead to some confusing ball-spin frolics) and bricks which take more than one hit to destroy.

▲ Smash those bricks!

▲ An amazing screen from *Centipede*. ▲ Where?

### COMMENT

JULIAN

Aaagh! What I thought would be a fun-packed stroll down memory lane has been turned into a miserable cherebang trip through neff conversal land! Considering that the original arcade machines were simple in the extreme, these Master System copies should be nigh on perfect. But they're not, and are instead awful hatchet job verelons. They're sort of fun for a while in their own simple way, but don't offer heat the entertainment and nostalgia that they would if they'd been properly researched and playtested. An opportunity mislead methinks. Hopefully we'll see an *Arcade Classics II* which makes full potential of its games. And if such a game is to be made, my vote is for *Screwball*, *Hunchback* and *Asteroids Deluxe*. Or maybe *Phoenix*, *Carnival* and *Zaxxon*...

The final title is the coin-op classic, *Missile Command*. This puts you in the boots of an SDI commander in charge of three anti-missile sites. Using a cursor, you target your guns to shoot down incoming missiles aimed at the six cities you have chosen to defend. Unfortunately, the missiles are constantly in motion and your guns are quite slow, so it is essential to target where the missile will be as opposed to where it is when you fire. Your task is made harder by planes and satellites who drop bombs upon your cannons (losing you precious ammunition) and even special devices which split into four warheads and spread out, thus making your job much harder. Once all six cities have been nuked, it's game over, although staving off the attacks for long enough allows blasted towns to be rebuilt.

# CLASSICS

## CENTIPEDE

Is centipede?

The first game on the list is *Centipede*. In this Space Invaders-esque game it is your job to protect a mushroom patch from evil insects by shooting them as they enter from the top of the screen. You can move all along the baseline of the screen, as well as come knifed forward movement. The hordes include snails, spiders and flies, but the biggest threat are the centipedes. These many-legged marauders head in from the top of the screen, anaking downwards from left to right and changing direction every time they hit a mushroom or the screen edge. Should you shoot the centipede in the head, it loses one body section but continues onward. If you shoot a centipede in the body, it splits in two, and keeps halving with every shot until you have tens of one or two black long centipedes running amok. The mushrooms act as cover for these blighters, but they can be shot away to clear a target path, although every time a creature is destroyed their remains turn into mushrooms. Should you come into contact with any of the insects, you lose a life and all the destroyed mushrooms are re-planted.

Gal those pesky missiles.

## COMMENT

### RAD

Arcade Classics is probably on of those things which seemed like a good idea at the time. Get three classic arcade games, spruce up the graphics and sound and release them all on one cart. Unfortunately, the programmers of *Arcade Classics* neglected to update the gameplay. This means that, with the exception of the timeless *Missile Command*, the sheer simplicity of the games is their undoing. *Breakout* is mildly amusing for about three minutes, except for the spillover-inducing scrolling backgrounds and grating, repetitive tune, but all too soon the lack of features makes even *Crackout* seem innovative and entertaining. *Centipede* is just a dim excuse for a game by anyone's standards, the controls are over-responsive and the collision detection is ludicrously bad. Even *Missile Command* has lost its appeal somewhat. The switching between titles is okay once you get used to it, but by an ironic twist of fate, the one enhancement made to the package seals the doom of its top game. The path of the missiles is not tracked as it was in the coin op, which makes predicting their flight much trickier and more time consuming, especially as they seem to change direction! *Arcade Classics* might be fun for a while, especially if you remember the originals and fancy a quick nostalgia fix. Sadly, the package is a remarkable disappointment with each game actually being inferior to their aged arcade counterparts.

**PRICE: CTBA**  
**RELEASE DATE: AUGUST**  
**GAME DIFFICULTY: EASY**  
**LIVES: VARIES**  
**CONTINUES: 0**  
**SKILL LEVELS: 1**  
**RESPONSIVENESS: SLOW**

## PRESENTATION 73%

Options for every game and "hilarious" cartoon intro.

## GRAPHICS 51%

Pretty basic and gaudy stuff. The backgrounds are sad to say the least

## SOUND 39%

Options for every game and "hilarious" cartoon intros.

## PLAYABILITY 54%

The controls are a little sluggish and the games don't really play half as well as the original coin-ops.

## LASTABILITY 47%

The games are fun for a short while, but no one is really going to play this for any great periods of time.

## OVERALL 51%

A reasonable idea but its potential has been wasted. Perhaps an updated version full of new features would set things right?

# SUPER NES

# REVIEW

It is said that the Brave One came to save civilisation. It is also said that he said, "I will battle the hosts of hell and destroy the evil crystal, Black Orb, so that light may live again." And it is said that everybody else said, "Oh, nice one!" and there was much rejoicing at the fact that the villager who wora nothing but pants was at last off to embarrass another community!

The Brave One's task is enormous. When he reaches the Dragon's Tower he must battle his way to the fiftieth floor, using his sword skills and magical abilities. Upon reaching the penthouse suite of the tower, he comes face to face with Drokmar (the Evil One) and the inevitable battle to the death commences.

Luckily, the task is not as erduous as it sounds. When the Brave One unlocks certain doors in the tower, a warrior labouring under a comparable psychosis, joins him in his quest. Also, there are hundreds of chests to open on the journey which might contain something handy (or something lethal if you're unlucky).

On certain floors one of Drokmar's strongest minions is waiting to pit its wits against our friendly meathead and his buddy. A new, more powerful sword is the prize for victory. And it is said that, should the Brave One restore light to the world, he might be forgiven for his pants fetish, providing he doesn't wear any beige or maroon ones!

## A BIG SWORD

As the Brave One slashes his way through the multitude of levels his sword is bound to suffer some wear and tear. Fortunately he is rewarded now and then with a new sword which is bigger and more powerful than his standard one. Should the Brave One sustain a hit he drops it, but he can pick it up again providing he does it quickly. It is even worth jumping into fire or spikes to regain the sword because it proves invaluable, especially when fighting bosses. There are six swords in all, of which the most powerful is the Sword of the Thunder God.

SWORD OF STEEL

SWORD OF THE EARTH

SWORD OF THE SUN

## DISPOSABLE HEROES

Drokmar has captured a number of warriors who can be released from their cages to aid your cause. There are eight allies in all, but only one can be used at a time. Companions are switched when the Brave One comes across another cage. Each warrior has particular essets that might prove useful against certain adversaries. The Priest throws missiles of light that are especially devastating to the undead. Amazon's skills at archery means she can kill at a distance and the Thief has a talent for finding hidden treasure. When the Brave One keeps an ally for any length of time their skill level begins to increase.

**REVIEW**

## A FLOORED CONCEPT

Magic Sword is a huge game with 50 levels, or floors in this case. Some of the floors are very short, and some contain bosses, but nearly all of them are worth exploring entirely because chests are often hidden beyond the door that leads upwards. There is a useful level select option on the front end which allows the player to come in at floor 33, leaving them 17 floors to tackle, if indeed they get that far.

▲ Mr Lizardmen and the Brave One team up against a nasty villain!

## THANKS

Thanks go to Console Concepts of Stoke for sending us our review copy of Magic Sword. Phone them on (0782) 712759 for more details about the game.

## COMMENT

### ROB

Visually this game is superb. The sprites and backdrops are all expertly drawn and the animation really brings the characters to life. The idea of involving another warrior also succeeds, providing a further dimension to the game. Also in its favour is the range of options the game possesses, especially the floor select option which cuts out the tedium of completing earlier levels. What I didn't like is the bland approach to the gameplay. It is purely a matter of slash, swipe and stab throughout all of the 50 levels. The only chance I had to refine my game playing skills was when I came up against one of the bosses. Before and after that, things continue in the same style. The same goes for the many items that can be accumulated. Whilst they prove useful, they do not do enough to make the gameplay any more exciting. Ultimately Magic Sword falls to impress because behind the visual spectacle is a game severely lacking in originality.

**SUPER NES****REVIEW**

## BIG BOSS GROOVE

On some levels the Brave One and his companion face up to one of the big bosses. It might be a fiery lion with wings, a dragon or a phoenix. With most bosses it is useful to have a companion who can throw things. This means that the Brave One can cower behind them and protect himself while his ally takes the damage. In the fighting arena there are chests well worth opening because they either contain items that restore life, or increase attack and defence capabilities.

## TREASURE HUNT

There is an endless amount of treasure chests in the Dragon's Tower. If the Brave One awakes one of them with his sword it opens to reveal an object that could be useful. There are 24 different items in all. Some just give a points bonus while others restore life. The magic items are the most interesting though. A gemlet increases attacking force and a golden pot helps an ally heal faster. The scroll item makes more items appear, and the King's crown increases defensive force. There are chests which cause harm as well and it is worth memorising where they are so you can avoid them next time around.

### RICH

Just far too repetitive for its own good. Once you've got over the variety in all of the different companions and worked out which objects are the best, there is very little more in the gameplay to provide interest. The shoot 'em up/ slashing action does not vary enough between each level and I must admit to getting pretty bored after ten stages. There are forty stages after that, but it was just too much of a chore to be worth bothering with. Magic Sword is okay, but is only recommended to people who really loved the coin-op and I doubt there are many of them about to be honest.

### COMMENT

In its favour, Magic Sword is quite a large game with plenty of aleah 'em up action and some very good ideas, like being able to change your companions on the quest. The graphics are also pretty good with some great characters to blow up in a variety of mystical ways. The music and spot effects serve to boost the atmosphere no and as well. So why isn't Magic Sword a mega game? It's quite simple. It's

**BY: CAPCOM****PRICE: £39.99****RELEASE DATE: OUT NOW****GAME DIFFICULTY: MEDIUM****LIVES: 1****CONTINUES: 3****SKILL LEVELS: 3****RESPONSIVENESS: OKAY**

## PRESENTATION 85%

Some informative title screens, a full range of options and a very useful floor select option.

## GRAPHICS 82%

Very likable sprites enhanced by the good animation. Detailed and atmospheric backdrop.

## SOUND 83%

Excellent sound effects and some entertaining music that captures the spirit of the game.

## PLAYABILITY 70%

Smooth controls, but the approach is bland and lacks challenge. The game suffers from slowdown at times as well.

## LASTABILITY 73%

There are 50 floors which might keep you playing for a while but the game gets boring and automatic after a while.

## OVERALL 71%

A graphically superb game with some interesting features, marred in the end by the lack of thought given to the gameplay.

# HOT LINES

WIN A

## SUPER NES

The Super NES is simply the greatest gaming tool in the universe! And there's one up for grabs on this red-hot 'phone line. You know the score. Dial away and see if you can win.

0839 335523

WIN A

## MEGADRIVE

If you've always wanted a Megadrive but have parents too stingy to buy one, why not try and win one in this amazingly easy-to-enter competition. Caress the knobs on your 'phone, dial up and listen.

0839 335524

## WIN £150 WORTH OF GAMES

Want to try and win enough games to fill your Y-fronts to breaking point? Well, dial away (being careful to use the number below) and that £150.00 worth of games you dream about could be yours!

0839 335525

WIN A

## GAME GEAR

Fancy trying to win one of these portable colour Game Gear doubloons? Dial up the number below and listen, and you never know, one of those fabulous machines could be all yours!

0839 335526

WIN A

## GAMEBOY

What's hard, six inches long and is great fun to play with in the toilet? A Gameboy. Of course! It's the best thing since dusted monkey ass and one of these pocket-sized wonders could be yours if you win the comp on this line.

0839 335527

IF YOU'RE UNDER 18, PLEASE MAKE SURE YOU HAVE THE PERMISSION OF WHOEVER PAYS YOUR 'PHONE BILL BEFORE YOU DIAL. ALL CALLS ARE CHARGED AT 38p PER MINUTE (CHEAP RATE) OR 45p PER MINUTE (ALL OTHER TIMES). NO PROGRAMME IS LONGER THAN THREE MINUTES.

While most of us are snugly tucked up in our beds, spare a thought for Little Nemo, a lad whose amazing dreams are quite unlike any others! One night Little Nemo is informed by a messenger that he has been chosen as the playmate of a princess who lives in Slumberland. As soon as Nemo enters this magical land disaster strikes when the King of Slumberland is kidnapped by the wicked King of Nightmares. After Little Nemo decides that there's always one of us who spoils the fun, he realises that it's his duty to save the good King and restore peace to the Land of Dreams.

Even though Little Nemo is only a kid, he does have a few things in his favour on this NES adventure. To begin with, he has been given an endless supply of candy (sweets to anyone who speaks proper English) which he regularly uses to win friends and slay enemies. Should Nemo be able to tempt animals into alliance he either rides on their back or actually transforms into them and acquires their abilities. But with plenty of nasty creatures standing in his way Little Nemo's dreams could easily become nightmares!

Little Nemo has been given an endless supply of candy, and rather than roll his teeth he has sensibly decided to use his sweets on his adventure. Basically they have two uses. If he throws candy at enemies, they are momentarily stunned. However, there are certain creatures who can be tempted to join Nemo if he gives them three pieces of candy. Unfortunately making contact with one of these creatures before feeding them is very painful...

# Little Nemo THE DREAM

## SOME FRIENDLY

There are six different creatures that Nemo has the ability to use once he has force fed them with candy. Here's a lowdown on the most common creatures Nemo finds.

## HERMIT CRAB

It is on the Night Sea level that this fellow proves most useful. He can dig into the sand to explore, and his pincers provide a nippy protection for Little Nemo.

## FROG

The frog is the first creature you find in the game. As you might expect, his leaping is excellent and his swimming unrivalled. However, he is very slow on the ground.

## HORNET

You won't come across this character until the second level but it proves invaluable here. Quite obviously the hornet can fly and this means that crossing gaps too long to jump becomes possible.

# NINTENDO REVIEW

牛奇集

## GET BY WITH

Picking the right animals in the right place at the right time is Little Nemo's biggest dilemma. Fortunately at the beginning of each level a character pops up to give Nemo some advice. Much of it is plainly obvious, but should Nemo do a bit of hunting around he may come across a room with another character in it who suggests what animal proves the most valuable on the level.

## COMMENT

### ROB

My first impression of this game after watching the title screen was that it was a game for younger kids and would therefore be pretty easy. I couldn't have been more

wrong. There is in fact a lot of tough gameplay in Little Nemo. I don't mind tough games, but Little Nemo's game logic has a number of problems. I found myself getting very frustrated at times because there are points in the game where maintaining power is more or less impossible. Another criticism of mine is that this game suffers from quite a bit of sprite flicker, especially when the screen is highly active. Looking on the bright side though, there are some excellent graphics and good animation, and the idea of riding or changing into an animal gives the game a further dimension which keeps things going at an entertaining pace. If you can stand the sometimes frustrating gameplay, Little Nemo is worth saving up for.

# MASTER

## GORILLA

If it's monkey business you're after, check out the gorilla. Although he isn't the fastest creature in the game, his right hook is pretty mean! He also has a big monkey ass.

## LIZARD

Be careful with the lizard! He carries no form of defence, but he is adept at scaling walls and trees. This is essential for getting through some of the later levels.

# NINTENDO REVIEW

## COMMENT

## RAD

Little Nemo isn't short on ideas, finding which creatures to use where and how is quite entertaining and makes the game somewhat more cerebral than your average platformer. The graphics aren't all that bad really, although the sprite are a little poorly defined at times, and the sound is passable. Unfortunately, Little Nemo is very frustrating for a couple of reasons. For starters the collision detection is pretty dodgy in the favour of the enemy creatures, allowing them to hit you from miles away whilst your attacks fail to connect despite their accuracy. The worst thing about Little Nemo is the number of instant-death locations where it is impossible to avoid injury. There's nothing worse than being down to your last reserves of energy and knowing you are approaching a trap or enemy which is going to kill you, without possible hope of escape. Little Nemo could have been a great game, as it is it's just a good effort spoiled by some tedious-inducing flaws.

A selection of  
naïveté from  
the game.

**BY: CAPCOM**  
**PRICE: £34.99**  
RELEASE DATE: OUT NOW  
GAME DIFFICULTY: MEDIUM  
LIVES: 3  
CONTINUES: INFINITE  
SKILL LEVELS: 1  
RESPONSIVENESS: OKAY

## PRESENTATION 75%

There's a good opening sequence and a continue option but no password system.

## GRAPHICS 86%

Some fine cartoon style graphics, but there is often a lot of flicker on the screen.

## SOUND 80%

Cute sound effects and a cheesy theme tune that grates after a few minutes.

## PLAYABILITY 81%

The controls are smooth and responsive, but collision detection is sometimes suspect.

## LASTABILITY 77%

There is much to keep the player amused, but the game logic at times causes intense frustration.

## OVERALL 79%

An original platform game but it is let down by a few problems in the gameplay that cause a lot of frustration.

# NINTENDO REVIEW

It's a ball's life, isn't it? Not only are you a mere length of bouncy material, suitable for bouncing balls off, but now you're trapped behind many walls of multi-coloured bricks, petrolled by a variety of fearsome alien guardians. Luckily, your spheroid-bouncing capabilities have provided you with a unique method of escape. By simply spanging a ball off various parts of what can be deemed your body, you can destroy the bricks which keep you prisoner, and the aliens as well!

Thus armed you set out on your Breakout-style bid for freedom, set over a number of static screens. Use your knowledge of ballistics and spatial geometry to destroy the bricks to best effect. If things get too hard, hit an enemy and grab a power-up. But watch out, you have only a limited number of balls with which to escape. Should you lose them all, you are trapped forever.

► Blast those blocks!

▲ Oh dear.

▲ Impossible screen ehoy!

## COMMENT

RAD

Crackout's only rival in the travails of the pilaous shambles they call Road Fighter. Right from the start, Crackout is boredom incarnate. There are no options and the little screen is as plain as it could get without just being copyright details. Start the game, and you are "treated" to a horrific cacophony that bodes badly for the rest of the game. Sadly, the game itself is even worse. The graphics are blandness extreme, unimaginative, poorly drawn and drably coloured. The deflection logic of the ball is decidedly ropery. It's impossible to hit the ball in a straight line for a start, and moving one pixel to one side usually results in a massive change of direction for the ball. The screens themselves are diabolical. The programmer's idea of a challenge is to either place a row of extra-hard bricks about one centimetre from your bat or to make the screen completely impossible unless you collect the right power-up. As the power-ups are distributed randomly, it's not unusual to spend up to ten minutes just killing aliens before finally leaving the screen. One specific screen which typifies Crackout is an example from the first level. The ball must be bounced through an alley of two walls to reach a few bricks otherwise protected. This can only be done by hitting the ball at exactly the right angle at exactly the right time. Should you achieve this, the ball will almost certainly hit the bricks immediately and the screen will be completed. It must have taken all of thirty seconds to think that one up, and for Crackout that's quite a complex screen! Crackout redelivers the words repetitively, frustrating and dull, and while it's not quite as bad as Road Fighter, it's still unforgivable that this ever saw the light of day.

## SPLAT THEM WITH YOUR BALLS

To complete each screen, every destructible brick must be thoroughly smashed. On some screens, though, green dinosaurs abound. These giant critters demand a good number of hits before copping it, as progress to the next screen is withheld until this is accomplished! Even worse, some of the little tykes move around, just to make your job that little bit more difficult.

# CRACK

## THE RETURN OF SUPERMAN

Fresh from his appearance in Road Fighter, the Men of Steel, Superman himself also pops his cloaked visage into Crackout. If you should happen to see Supes flying down the screen in your direction, be sure to position your bat in his flight path. The aortal wonder should then fly off to the next level in his own Kryptonite fearing way

## BUSTING BALLS

The job of brick busting is made somewhat easier by the power-ups held in the possession of those alien monsters. Icons drift down the screen upon the demise of their owners and these have a variety of uses. One puts the creatures to sleep for a limited time, another enlarges the bat, split-balls are also available, along with exploding shrapnel balls. One of the better bonuses, however is the rocket launcher. This enables you to launch missiles from your bat which explode with one press of the B button, destroying any meenies or bricks in the surrounding area.

## COMMENT

What do you get when you program a Breakout-style game with diabolically boring and unimaginative screen layout, creepy bat control, hopeles

collision detection, a tune that's about as pleasant as a beboon farting in your ear, graphics which are about as thrilling as a beboon moaning in your face, totally unrealistic ball movement, action that's so dull that you want to turn the game off after fifteen minutes of playing and some totally irritating gameplay quirks like the fact that power-ups are random and often they're vital to complete a screen so you hang about for ages waiting for them to appear? Crackout.

牛牛集

BY: KONAMI

PRICE: CTBA

RELEASE DATE: TBA

GAME DIFFICULTY: VARIABLE

LIVES: 8

CONTINUES: INFINITE

SKILL LEVELS: 1

RESPONSIVENESS: DREADFUL

## PRESENTATION 20%

No options and barely a title screen.

## GRAPHICS 36%

Samey backgrounds, dull, badly drawn and poorly animated enemies and inept colours.

## SOUND 21%

A few different collision noises and... er... that's it.

## PLAYABILITY 19%

Poor controls, illogical bounce logic, possibly the worst designed screens ever, lack of challenge and frustrating bugs.

## LASTABILITY 9%

It's very easy (when it's not ridiculously impossible) and the poor gameplay will keep you not coming back to it.

## OVERALL 13%

A dreadful Breakout game which should be taken into the middle of a desert and buried in a deep, dark hole.

# NEW GAME

# P REVIEW

HOT CONSOLE GAMES COMING SOON...HOT CONSOLE GAMES COMING SOON...

Acclaim have scooped up the licence to one of the most talked about movies of the year - *Alien* (I). In the film, Ripley (the heroine of *Alien* and *Aliens*, played by Sigourney Weaver) crash-lands on a dark, sinister prison planet. However, the prisoners aren't the only living beings on the planet - the Aliens are out and about, ready to inflict some more stomach-exploding punishment as only they can.

The film has been translated into a Megadrive scrolling platform shoot 'em up, with Ripley running about causing grievous harm to any of the Aliens that she comes across. Her general objective is to locate all of the prisoners dotted around the eight-way scrolling landscapes and save them from an Alien-related demise. In the finished game, there are fifteen levels for Ripley to conquer before all of the inmates are rescued and the Alien menace disposed of.

MEAN MACHINES has been treated to an extensive preview of this potentially topper game. From what we've seen it's shaping up really well, with excellent graphics, great animation (watch that Alien get ripped apart as a bazooka shell explodes in its guts!) and amazing atmospheric music. What we aren't prepared to tell you is how well the game plays. We'll be letting you in on that in a couple of months when we're reviewing the finished game!

An Alien pounces at Ripley, causing much damage.

Those nasty Aliens have a tendency to sneak up on poor Ripley rather quickly, but luckily she has some sort of warning in the form of her Motion Detector. This useful piece of kit locates any Aliens in the immediate vicinity, allowing Ripley to ready her firearm. The Motion Detector also indicates the presence of any nearby prisoners which is very useful indeed.

## NO GUNS? NO THANKS!

For anyone who's read about the movie, it's no news that Ripley has no guns of any description in the new film! Acclaim reasoned that 20th Century Fox, saying that the game wouldn't be any good without some decent firepower. Luckily, 20th Century Fox agreed in the game Ripley carries all sorts of heavy duty assault hardware! However, the basic premise of the movie and its setting remain the same.

An Alien blows up in a spectacular manner.

# ALIEN 3

This time it's hiding in the most terrifying place of all.

Watch out for some real one.

► Flame on! An Alien buys the farm in a blaze of fire.

## SHOOTING OFF

Ripley has access to many different weapons, all of which come in handy when it comes to dusting the monkey asses of those nasty Aliens. However, each weapon has an ammo limit, so be careful!

**PULSE RIFLE:** Ripley's standard weapon requires many hits to destroy the larger Aliens, but comes in handy for smelter foes like Face Huggers. A fairly decent weapon.

**BAZOOKA:** The coolest! The Bazooka fires off single shells that rip an Alien to shreds. It also comes in handy for blowing up any doors that refuse to open through more conventional means.

**GRENADES:** These are best used in ventilation ducts or on ladders. Just drop them down on any Aliens below and watch them explode! They aren't much use in many other situations though.

**FLAMETHROWER:** Go a-roasting and a-toasting with this useful weapon! The Flamethrower lines up Aliens in seconds and is very useful against Face Huggers and the pods from which they came.

▲ Grenades at the ready, Ripley explores a later level of the game.

## MEGADRIPE

1  
PLAYERS

## VENTILATION EXCITATION

To get into different parts of the prison complex, Ripley makes use of the various ventilation ducts. These invariably offer short-cuts or ways for you to reach prisoners you can't otherwise get to.

Unfortunately, some of the Aliens have holed up in these ducts and are ready to cause Ripley some serious hassle. Making matters worse is the fact that Ripley can't see around corners in these ducts. She must use an old-fashioned Motion Detector to determine any Alien presence.

GAME**

# PREVIEW

## KRUSTY'S FUNHOUSE

### SUPER NES

The first Simpsons game on the Super NES looks like being one of the most fun, playable games on the system!

Krusty's Funhouse casts you as Springfield's chief clown, Krusty the Clown - idol of every child, including one Bart Simpson. The problem is, his amazing Funhouse has been infested with swarms of rats and it's his job to sort out the mess. Luckily, his number one pal, Bart Simpson is on hand to help out a bit.

The general objective is sort of like Lemmings in reverse. As Krusty, you've got to manipulate the platform environment in order to guide the rats towards a special chamber, where Bart disposes of them using a number of hilarious methods.

The sheer size of the game is stunning. There are loads of different levels to conquer and the game requires all your cunning as well as testing your reactions. We'll be reviewing Krusty's Funhouse just as soon as it's finished. Look out for it, it's going to be hot!

▲ There's some space here for us to print a couple o' screenshots of the 8-bit NES version of Krusty's Funhouse too! This looks like being just as cool as the mega Super NES game!

Based on the not-too-successful film, *Darkman* puts you in the boots of one of the strangest heroes of all time - the eponymous *Darkman*!

In this officially licensed conversion of the movie, you play *Darkman* as he runs around the eight-way scrolling platform environment, dishing out *Darkman*-style punishment to all of his enemies. He also has to negotiate many hazards in the platform environment, that include lifts and even tightropes! We've had a good go at a finished copy of *Darkman* and reckon it's got very classy graphics and sound. What we won't let on is the quality of the gameplay. You can read about that when we review the finished product in a future edition of *MEAN MACHINES*.

▲ *Darkman* has the ability to scale the walls like *Spider-Man*! This really comes in handy should you just miss the edge of the platform.

## NINTENDO

The shambling Bruce Willis flick (one of Hollywood's biggest disasters ever) has been converted by Sony Imagesoft into a scrolling platform game with thieving overtones.

In the 8-bit Nintendo version seen here it's your job to infiltrate a number of buildings and halt every valuable going. But watch out, because there are a number of security hazards to overcome including laser beams, guard dogs and security officers! Your only means of defence is a ball which you can throw at your assailants to stun them.

*Hudson Hawk* is complete and has been available in the States for quite some time. Unfortunately, we have no details of a UK release, but we will review the game closer to that time.

## NINTENDO

# BART VS THE SPACE MUTANTS

The first Nintendo Simpsons game, *Bart Vs The Space Mutants*, has been converted to the Megadrive. The game looks like being a straight conversion of the 8-bit hit, with only the inclusion of minor graphic improvements making it any different from the original game.

If you didn't know, the game involves the cheeky exploits of young Bart, as he strives to save the world from a race of twisted Space Mutants out to take over the whole world. In order to further their murderous action, they are collecting a series of purple objects from Springfield which can be used to fuel their lethal weapons.

As luck would have it, Bart catches wind of this plot, and sets out to completely destroy or deface the items the Space Mutants need to conquer the world! He achieves this by traversing the horizontally scrolling stages that make up Springfield, painting all the offending articles red and generally getting up to all sorts of Bart style mischief and capering.

Simpsons fans should lap this conversion up, but you'll have to wait for a forthcoming **MEAN MACHINES** for the definitive review.

## MEGADRIVE

# SWITCHBLADE II

ROCKET BOOSTS 200K

One of Gremlin Graphics most successful computer platform games has been converted to the Nintendo Switchblade. It casts you as an acrobatic secret agent out to infiltrate a series of scrolling platform levels, dispensing his own form of photon justice to the evil enemy agents that get in his way. To aid him in this arduous task, your agent has been equipped with a bionic arm with all sorts of power-up weaponry. It's up to you to make good use of these amazing assault devices to bring down the enemy menace once and for all.

As you can see from the screenshots we've printed on the page, *Switchblade II* is looking really smart. We'll give you more details about the game in the near future.

## NINTENDO

# UTOPIA

Utopia is another stunning Gremlin Graphics game that is currently in the process of being converted onto a console.

In the game, you are charged with the task of building a thriving series of space colonies on a whole range of different planets. It's your job to provide houses, entertainment and power for each world and attract colonists to your world. Defending your worlds and keeping your colonies safe is essential as nasty aliens have a habit of turning up and attempting to destroy or take over your worlds. This deep and involving game is scheduled for release on the Super NES and as you can see from the screenshots, it looks like being a fine conversion. Look out for more news in the pages of MEAN MACHINES during the next few months.

## SUPER NES

# Castlevania 3

Simon Belmont returns to the 8 bit NES in another legendary platform adventure. Once again, Dracula has risen from his coffin and is terrorising Mr Belmont and his family. So, pausing only to grab his trusty whip, Belmont sets out in search of his vampire nemesis.

As you can tell from the screenshots, Castlevania III is another four-way scrolling platform romp, rather akin to its Super NES successor. There are many chambers and levels for Belmont to explore, all thriving with vampire bats, skeletons and other nasties.

We've had a quick look at a completely finished copy of Castlevania III and came away very impressed with its graphics and sound. We can also report that the gameplay is pretty good too! However, we shall reserve judgement until next month, where we will give the game the MEAN MACHINES review.
